Read Carefully Before Ordering

All prices in this catalogue, owing to uncertain market conditions, are subject to change without notice. Should there be a drop in the market on any article (listed in this catalogue) at time of purchase, we will gladly give the customer the benefit of the reduction. This policy applies to all grain, grass, vegetable and flower seeds as well as all other items quoted herein. WE DELIVER all Vegetable and Flower Seeds when bought at the packet, ounce, or $\frac{1}{4}$ pound prices, but when seeds ordered are listed in pounds, postage should be added at the rate of 8 cents per pound. Each additional pound add 1 cent. Insurance 3 cents. In all other cases goods will be SHIPPED F. O. B. LEWISTON.

No charge for packing, unless otherwise stated. Bags will be charged for as follows: 2 bushel bags, 30 cents; $\frac{1}{2}$ bushel bags, 20 cents; peck bags, 15 cents; $\frac{1}{2}$ peck bags, 10 cents.

We give no warranty expressed or implied, as to description, quality or productiveness of our seeds, and in sending them out, will in no way be responsible for crops or lack of satisfactory product from our seeds. If the purchaser does not accept the goods on these terms, we must be notified at once, when we will give full instructions for disposition of such goods. This is the invariable rule of reliable business houses.

We do, however, purchase our seeds from reputable growers and employ every means, taught us from years of successful dealing in seeds, to insure proper grading and purity. Seeds are tested by our experts before offering them for sale, so we are as reasonably sure of their germination as nature and science permits of assurance.

PARCEL POST INFORMATION ON PAGE 12

NOTE—We would deem it a great favor if our customers, or those wishing to remain on our mailing list, thereby receiving our catalogue, would inform us of change in address.

“GOOD EQUIPMENT MAKES A GOOD FARMER BETTER”

Foreword

Soil and yield are not affected by business conditions, but seeds are lower in price. They are cheaper this year than they have been in a decade. Because the soil will produce just as much as it did last year with like treatment, the crop should be larger with more seed to the dollar. Price of products may have been lower last year but the wise farmer will see a season as a possible rising market offers a better price. More intensified should be the tilling of the soil in times like these, for like any business that is to go through, every advantage should be watched and taken.

By the presentation of this, the 1932 catalog, it is with respect of the truth that the statement is made: That on its pages will be found lower prices on flower and vegetable seed, poultry and dairy equipment, as well as other sundry items. Since 1870, when this business was founded, diligent research has supported the method of selection of the things that are offered in this catalog.

CHOICE FLOWER SEEDS — General List

MOST flowering plants will live in almost any soil, but to give them a fair chance to develop, some care should be taken to make the ground suited to their needs. The soil best adapted for flowering plants generally is a light, friable loam, containing a sufficient amount of sand to render it porous. Many flowers are better if produced on plants of vigorous growth, hence a portion of the garden should be prepared by deep digging, thorough pulverization and liberal enriching with large quantities of well-rotted manure. Since some other varieties produce the largest and finest colored flowers when grown on rather light, poor soil, a portion of the garden should not be enriched. While some seeds need special treatment, the following general rules will apply to all. Make the surface of the soil as fine, smooth and level as possible; do not plant when the ground is wet; cover each lot of seeds to a uniform depth, which should be not more than four to six times the diameter of the seed; press the soil firmly over the seed; plant in rows so that the starting plants can be seen easily; thin out the young plants to prevent crowding and keep entirely free from weeds.

POSTAGE PREPAID ON ALL FLOWER SEEDS IN PACKETS AT PRICES QUOTED.

SPECIAL INDUCEMENTS.

When the money accompanies the order, purchasers of Seeds in packets at catalogue prices may select 25 CENTS' WORTH EXTRA PACKETS FOR EACH \$1.00 SENT. Thus anyone enclosing \$1.00 MAY ORDER SEEDS IN PACKETS AMOUNTING TO \$1.25. Two dollars sent to us with the order will pay for seeds IN PACKETS amounting to \$2.50 and so on. This offer does NOT include seeds in collections by weight or measure, bulbs, plants, or anything EXCEPTING SEEDS IN PACKETS.

Plants are generally known and described as Annuals, Biennials and Perennials. The term annual is applied to plants which flower and ripen their seeds the same season. Hardy annuals are those which may be sown in the open ground. Half hardy annuals are those which should be started in the house and transplanted to the garden. The term biennial is applied to plants which flower the second season after planting and then perish; the term perennial to plants which flower the second season after planting, and continue to flower year after year.

ADONIS. (Pheasant's Eye). Hardy annual. This showy plant with dark green feathery foliage bears small deep crimson flowers with dark centers. Remain in bloom a long time and keep long as a cut flower. One foot high. **Pkt., .10**

AGERATUM. (Floss-Flower). Half hardy annual. Blossoms continually throughout the summer and thrives in hot weather. Highly prized for bedding out, and valuable for winter blooming indoors.

Imperial dwarf. Dark blue. 9 in.; good for edging. **Pkt., .10**

ALYSSUM. Very hardy, free blooming dwarf plants, all varieties growing freely in common soil. The pretty, fragrant flowers are much prized for bouquets; excellent for the summer garden.

The perennial variety is very useful in the rock garden.

Little Gem. White. Hardy annual. They grow but three or four inches in height, very compact, or spreading growth, each plant often forming a circle a foot in diameter. **Pkt., .10**

Saxatile Compactum. Perennial. Grows about nine inches high, producing a mass of yellow blossoms. **Pkt., .10**

ALYSSUM

AMARANTHUS. Ornamental foliage. Very striking and effective decorative plants. Sow early and set out young plants early in June. Annual.

Tricolor. Mixed—Carmine scarlet, splendid variety. 4 to 5 feet. **Pkt., .10**

ANTIRRHINUM. (Snapdragon.) Beautiful, hardy, free blooming plants for summer and fall. Flowers the first year from seed as annuals and should be treated as such. Average height, 1½ feet.

- Crimson Pkt., .10
- White Pkt., .10
- Finest Mixed..... Pkt., .10

ANTIRRHINUM

AQUILEGIA. Columbine. Hardy perennial. One of the most beautiful of the old-fashioned flowers.
Finest Mixed.....Pkt., .10

ASTER

ASTER. One of the most popular flowers grown. Of easy cultivation. For July and August flowers seeds should be started in a hot bed. Seeds sown in the open ground in May will bloom in September and October. Fine for cut flowers.

AMERICAN BRANCHING. A free growing Aster of robust, erect habit. The blossoms are large and are borne at the end of each branch. They are almost round and are very desirable for cutting. Height, 2 to 3 feet.

- Crimson.....Pkt., .10
- Rose.....Pkt., .10
- White.....Pkt., .10
- Finest Mixed.....Pkt., .10

GIANT COMET. These are one of the most popular varieties. The plants are of a pyramidal form and the blossoms, whose petals are curled and twisted, are borne on long strong stems. They resemble Japanese Chrysanthemums. Height, 2 feet.
Finest Mixed.....Pkt., .10

HEART OF FRANCE. The largest flowering dark red Aster grown. Opens red and deepens with age, retaining its beauty to the end. Flowers are borne on long strong stems. Height, 2 feet.....Pkt., .10

AMERICAN BRANCHING

QUEEN OF THE MARKET. An early flowering variety. Flowers are of medium size, fully double, and have long slender stems. Very fine for bedding. Height, 1½ feet.

- Finest MixedPkt., .10

EARLY AMERICAN BEAUTY. Magnificent large flowers carried on long stout stems. Vigorous, bushy plants. Height, 2½ to 3 feet.

- Blue.....Pkt., .10
- Crimson.....Pkt., .10
- White.....Pkt., .10
- Mixed.....Pkt., .10

CALIFORNIA GIANTS. Flowers are of large size with curled and twisted petals. Long stout stems. Height, 2 feet.

- Dark Purple.....Pkt., .10
- Rose.....Pkt., .10
- White.....Pkt., .10
- Mixed.....Pkt., .10

ALL SORTS MIXED. A mixture of all varieties and all colors.Pkt., .10

BALSAM. Annual. Beautiful plants for the summer garden. They should be started early in heat and transplanted.

- Double Dwarf Mixed.....Pkt., .10

BOSTON IVY. A favorite hardy perennial climber with large five-lobed leaves turning to a bright red color in the fall. It easily clings to walls of wood, brick or stonePkt., .10

CALENDULA. Vigorous, hardy, free-flowering annuals, with large, flat, double flowers; valuable for growing in light soils, or dry situations. They are useful as cut flowers, and are frequently grown under glass during winter for cutting. 1 foot.

Calendula

BALL'S ORANGE. Beautiful well formed flowers of bright orange color and borne on long stems. Pkt., .10

RADIO. A new variety of Calendulas which is becoming very popular. The flowers are globular in shape with bristling quilled petals. The color is rich orange.Pkt. .10

CALLIOPSIS. A half hardy annual of quick growth, doing well in almost any location, and blooming throughout the season. It is exceedingly showy and of easiest culture.....Pkt., .10

Dwarf MixedPkt., .10

CAMPANULA. Hardy perennial. These grand old flowers are of easiest culture, and one of the most attractive. Sow seed in the open the last of June or first of July, and transplant. They will bloom the following spring if protected over winter.

Medium. Old fashioned Canterbury Bell.

MixedPkt., .10

Cup and Saucer MixedPkt., .10

CANNA. Indian Shot. Annual. The luxuriant foliage and superb flower of the Cannas, especially of the new French and Italian races, easily places them foremost among our sub-tropical plants.

Crozy's Newest Mixture.....Pkt., .10

CANDYTUFT. Showy, hardy annuals, growing about a foot in height. Excellent for bouquets.

Carmine.....Pkt., .10

Empress WhitePkt., .10

MixedPkt., .10

CARNATIONS—Marguerite—The earliest of all Carnations, blooming in July or August if sown in spring and continuing till frost. Being half-hardy perennials, a slight protection of coarse straw or pine boughs will preserve them during winter and they will flower profusely the next summer, or they may be potted to bloom during the winter in the house. The flowers are large, about eighty per cent. usually coming double; beautifully fringed and clove-scented.

Giant White.....Pkt., .10

Giant Rose.....Pkt., .10

Giant Red.....Pkt., .10

Giant Mixed.....Pkt., .10

CENTAUREA. Flowering Annuals. Giant Corn Flower. The flowers are of enormous size; and of the most charming colors, including white, pink, lilac, rose and purple. They are among our best summer flowers for cutting.

Dark Blue.....Pkt., .10

Cyanus—Bachelor's Buttons, mixed.....Pkt., .10

Centaurea Cyanus

CELOSIA, or Coxcomb. Showy annuals of easy cultivation; producing large, brilliant, comb-like flower heads. They prefer a light soil, and should not be allowed to become crowded if a dwarf habit is desired.

Tall Mixed.....Pkt., .10

CHRYSANTHEMUM (Annual Varieties)
Showy, hardy annuals of easiest cultivation and blooming early in summer. They are most desirable for sea-shore and mountain garden. Height, 2 feet.
Double MixedPkt., .10

COBOEA SCANDENS. Tender Annual. A fine rapid growing climber with handsome foliage and large, bell-shaped flowers, green at first but rapidly changing to a beautiful, deep violet-blue. Seed should be planted on edge in hot bed or rather dry soil and barely covered.Pkt., .10

CONVOLVULUS MAJOR—Tall Morning Glory. Hardy annual. The most popular and widely grown climber for covering verandas, trellises, etc.
Finest MixedPkt., .10
Japanese Morning Glory.....Pkt., .10

COSMOS. Annual. This is one of our most useful and beautiful autumn flowers. To get it in bloom early, the seed should be sown in May in the open ground where the plants are desired to bloom, and the seedlings allowed to grow and flower without being transplanted.
Finest MixedPkt., .10
Double Flowering MixedPkt., .10

COSMOS

CYPRESS VINE. Ipomoea Quamoclit. Very graceful twining annuals with feathery dark green foliage and star-like flowers. Twenty feet.

Scarlet.....Pkt., .10

DAHLIA. This popular flower can be easily raised from seed and flowered the same season. The roots should be placed in dry sand and kept in a cellar where there is no frost during the winter.
Finest MixedPkt., .10

DELPHINIUM—Perennial Larkspur. One of the most beautiful of the perennials. They are of easy culture and of vigorous growth.

The New Hollyhock Strain. Height, 3 to 4 feet.
Pkt., .10

DELPHINIUM

DIGITALIS. Foxglove. Biennial. Old-fashioned hardy plants producing spikes of thimble-shaped flowers, often two feet long.

Gloxinae flowered. MixedPkt., .10

DOLICHOS LABLAB. (Hyacinth Bean.) Annual. Purple. 10 feet.Pkt., .10

GAILLARDIA. Blanket Flower Perennial. Daisy-like flowers in various shades of yellow with dark brown centers. Blooms the entire season.
Finest MixedPkt., .10

ESCHSCHOLTZIA. California Poppy. The bright colors, long duration and dwarf habit of these free-blooming, hardy annuals, admirably adapt them for massing and border planting. Height, 1 foot.

California Alba—WhitePkt., .10

YellowPkt., .10

MixedPkt., .10

HASKELL IMPLEMENT AND SEED CO. LEWISTON MAINE

DIANTHUS. Annual. Chinenses. Double Chinese Pinks. Finest MixedPkt., .10

Heddewigii (Japan Pinks). Single. First-class selected. MixedPkt., .10

Chinese Pinks

GOURDS. Luxuriant, climbing annuals, useful in covering arbors, fences or slopes, and bearing gourds which are of interesting forms and colors. 10 to 15 feet:

MixedPkt., .10

GYPSOPHILA. Infant's Breath. Annual. Free flowering, hardy plants, extremely light and graceful, easy of cultivation, and most useful for bouquet and cut-flower work. Height, 18 inches.

MixedPkt., .10

PERENNIAL INFANTS BREATH. Fine for bouquets. Blooms first year from seed if sown early.

WhitePkt., .10

HELIANTHUS. Sunflower. Hardy annual. The large varieties are useful in forming backgrounds of large beds or borders and for distant effects, while the smaller sorts may be planted with scarlet Salvia, Cannas and other tall bedding plants, besides being excellent for cutting.

Double MixedPkt., .10

HELIOTROPE. Delightfully fragrant greenhouse perennial; excellent for bedding or indoor cultivation and particularly useful for cutting.

Giant. Newest large flowering varieties mixed.
Pkt., .10

HELICHRYSUM. Everlasting Flower. Showy annuals for beds or borders; useful as dried flowers for winter bouquets, for which use the blooms should be cut before they are fully open, and hung up to dry with the flowers downward if stiff stems are desired. Height, 2 feet.

Double Mixed.....Pkt., .10

HUMULUS JAPONICA. Japanese Hop. Splendid annual climber of fast growth and very ornamental. 12 ft.Pkt., .10

KOCHIA TRICHOPHILA. (Standing or summer Cypress.) Splendid ornamental annual of unusually quick growth, forming regular pyramids of about 3 ft. in height. The slender-leaved plants are of a cypress-like appearance during the summer, changing their light-green foliage to carmine and blood-red colorings. The plant, also called "Burning Bush," is of great value when planted singly or in groups, as well as for pot culture. 3 ft.....Pkt., .10

Helichrysum

Larkspur. Splendid hardy annuals with showy flowers borne on long spikes; white, lilac, and all shades of blue; excellent for cutting. Height, 18 inches.

Double Tall. Branching or stock flowered mixed.
Pkt., .10

HOLLYHOCK. Hardy Biennial. This ever popular hardy favorite of our gardens has very few rivals in majestic grandeur. Hollyhocks succeed best in rich, well-drained soil. They should be lightly protected during winter with pine boughs, coarse straw, or other mulch not liable to rot. Seeds sown in July produce fine plants for blooming the following summer. 6 to 8 ft.

Chaters Strain. Double finest mixed. Pkt., .10

HOLLYHOCK

LOBELIA. Annual. The Erinus varieties are most valuable for edgings, hanging baskets and vases, blooming profusely from June till frost.

Crystal Palace Compacta. The darkest blue. Pkt., .10

LUPINUS—Hardy Lupines. A hardy, showy perennial with long spikes of flowers. Fine for cutting.
Finest Mixed.....Pkt., .10

MARIGOLD. Tagetes. These handsome half-hardy annuals when well grown cannot be surpassed either in mixed borders or when grouped together. They succeed best in moderately rich soil and in open situations, and are strongly recommended where a gorgeous display in the autumn is an essential feature.

African—Double tall yellow.....Pkt., .10
African—Double tall mixed.....Pkt., .10
French—Double tall mixed.....Pkt., .10

MARVEL OF PERU—Four O'clock. An old-fashioned, sweet-scented annual of various colors. Useful for beds or borders. Height, 2 ft.
MixedPkt., .10

MIGNONETTE. Reseda Odorata. The most fragrant annual, prized as much for forcing in winter as for the summer garden. The seed should be sown early and the plants as they grow, thinned sufficiently to allow them to branch. The beds should be liberally watered during dry weather.

Parsons's White.....Pkt., .10
Machet, RedPkt., .10
Sweet Scented Mixed.....Pkt., .10

MYOSOTIS—Forget-Me-Not. Dwarf, half-hardy perennials, bearing a profusion of little, star-shaped flowers. They thrive best in rather moist, shady situations. Most of them will bloom the first year from seed if sown early.

Palustris—True Forget-Me-Not. Dark blue, very beautiful; profuse flowering. Pkt., .10

MARIGOLD

NASTURTIIUMS

NASTURTIIUMS—Dwarf varieties mixed.

Tom Thumb, or Dwarf. These hardy annuals are of easiest cultivation; succeeding best in rather light soil, withstanding heat and drought and flowering profusely from June or July until cut down by severe frost, usually well into November. The dark-leaved varieties are particularly adapted for ribbon beds and borders, the brilliant flowers contrasting admirably with the bronzy foliage. Height, 1 foot.

Finest Mixed. Our special mixture of the finest sorts, in great variety of color.

Pkt., .10; oz., .15; 1-4 lb., .45

NASTURTIIUMS—Tall or Climbing.

Besides their ordinary garden use for trailing over fences, trellises, stone walls, etc., these can also be grown as pot plants for winter flowering, as screens or as trailers for hanging baskets and vases; 8 to 12 feet.

Finest MixedPkt., .10; oz., .15; 1-4 lb., .45

NICOTIANA Affinis—Annuals.

Sylvestris. A splendid new variety with glaucous leaves and large pendants, pure white, tube shaped flowers; a very stately plant.

Pkt., .10

PAPAYER or Poppy. Annual varieties, showy, hardy annual of the easiest cultivation and embracing many rich and beautiful colors. The seed should be sown early in spring where intended to bloom.

Shirley—Finest mixed. A most charming race of single Poppies with shining flowers of silky texture, varying in color from pure white and delicate pink to rosy carmine and deep crimson; many of them being beautifully striped and edged with white. The blooms if cut when young will keep in water for two or three days. Height, 2 ft.

Pkt., .10

Double Carnation Mixed.....Pkt., .10

Perennial Varieties. These large flowered kinds are very imposing with their fiery blooms which are sometimes six inches across.

Oriental. Orange Scarlet with black center. Pkt., .10

PETUNIA. The Petunia is popular because it is of easiest cultivation, blooms from early summer continuously until frost and is one of the most showy and free-growing annuals. Height, 12 to 15 inches.

Single Flowering Petunia

Hybrida—Finest MixedPkt., .10

Fimbriata—Fringed, Single Mixed.....Pkt., .15

Rosy Morn. Pink, with white throat. Fine for bedding.....Pkt., .10

Senator. Purple with white throat. Pkt., .10

Double Flowering Petunia

Double Fringed—Extra Large.....Pkt., .20

DOUBLE FRINGED PETUNIA

PANSY

Pansy, or Heartsease. Too much importance cannot be attached to the culture of these beautiful plants, flowering as they do in great abundance for several months. When sown in the early spring a good display in most cases can be had in the following fall, but the best results are not obtained by so doing. To obtain fine blooms it is better to sow during summer and transplant the seedlings in cold frames in September, protecting during the winter with mats or shutters. Pansies delight in a cool, moist, well drained soil, enriched with decomposed barn-yard manure. They should never be allowed to suffer for want of water.

Giant Blue.....Pkt., .10	Giant Purple.....Pkt., .10
Giant Black.....Pkt., .10	Giant Yellow.....Pkt., .10
Giant White.....Pkt., .10	Giant Ruffled Mixed,
Giant Mixed.....Pkt., .10	Pkt., .15

PHLOX DRUMMONDI. This is one of the finest annuals, being hardy, easy of cultivation and making as a summer bedding plant an effective and brilliant display. The flowers are of large size, finely rounded form, and with well-defined eyes. The colors are superb.
Grandiflora Finest Mixed Pkt., .10

PHLOX. Perennial. Another of the old-fashioned flowers. Grows from 2 to 3 feet high, with large heads of fragrant blossoms.
MixedPkt., .10

PORTULACA. Charming dwarf annuals for sunny situations or light soils, producing flowers of most brilliant colors in great profusion. Height, 6 inches.

Grandiflora Plenissima—Double Mixed Pkt., .10

Grandiflora—Fine Single Mixed.....Pkt., .10

PHYSALIS. Chinese Lanterns. A hardy perennial grown for its scarlet seed pods, which are easily dried for winter bouquets. Easily grown.Pkt., .10

SCABIOSA. Mourning Bride. Hardy annual. Handsome summer border plant, producing splendid flowers in all colors on long stems, making them ideal cut flowers which keep for a week in water. 2-2½ ft.
Finest MixedPkt., .10

SCABIOSA

RICINUS. Castor Oil Plant. Tender annuals of rapid and gigantic growth, producing enormous dark green or bronze-colored palmate leaves; excellent for sub-tropical beds, or for massive foliage effects on lawns or backgrounds.

Zanzibariensis. Mixed. A new and distinct race from East Africa, producing leaves of enormous size, varying in color from light green to purplish red. Height, 15 feet,

Pkt., .10

SALPIGLOSSIS. Half-hardy annuals; elegant late summer flowering plants of great diversity in color; beautifully penciled in rich tints of yellow, purple and brownish red. Of easy culture.

Grandiflora—Finest Mixed.....Pkt., .10

SALVIA. Flowering Sage. Very ornamental; flowers borne in spikes of fiery red, crimson or blue, and continue in bloom in open ground until after severe frosts. Start in heat and transplant into light soil one or two feet apart. Tender perennials, but bloom the first season. Height, 2 ft. to 3 ft.

Splendens—ScarletPkt., .10

SWEET WILLIAM. Dianthus Barbatus. Showy, hardy biennials of easiest culture; admirable for clumps among shrubs or borders. Height, 18 inches.

Hunt's Perfection Mixed.....Pkt., .10

SWEET WILLIAM

SWEET PEAS

SPENCER VARIETIES

The Spencers are of exceptionally large size, the standard and wings waved or frilled and the general effect remarkably graceful and attractive. The plants are of vigorous growth and remain in bloom for a longer period than the ordinary sorts. They are produced abundantly on long stems, making them most desirable for cutting.

Asta Ohn. Suffused lavender, sometimes with pinkish tinge.

Countess. Bright, clear pink, sometimes darker toward the edges; very large with long stems. One of the very best.

Florence Morse. White with pink edge.

Helen Lewis. Rich orange.

King Edward. Brilliant crimson scarlet; very large size and of open form.

Nubian. Beautiful deep maroon. One of the most reliable of the maroon shades of Spencers.

White. Pure white. Beautifully waved and fluted. Very large size.

Mixture. A very fine assortment of the best varieties. Separate Colors.....10 per Pkt., .20 oz.
Mixture10c per Pkt., .20 oz., .75 ¼ lb.

ZINNIA

STOCK—Gilliflower. Half hardy annual. The charming colors, delightful fragrance and free-blooming character of the Stocks have made them favorite plants for both summer and winter cultivation. They are very effective for beds and borders, and their handsome spikes are invaluable for bouquets and floral decorations.

Large-Flowering, Double Ten-Week Varieties. Highest grade, pot-grown seed. The best variety for early summer blooming, producing massive pyramidal flower spikes of brilliant colors and delightful fragrance. Height, 1 foot.

PinkPkt., .10
WhitePkt., .10
Finest MixedPkt., .10

VERBENA. The Verbena is one of the most decorative and easily grown bedding plants. If started in heat in March the seedlings begin to bloom in June and continue until frost. Plants raised from seeds are stronger and flower more freely than those grown from cuttings. Half-hardy perennials. Height, 1 foot.

Hybrida—Mammoth mixed.....Pkt., .10
Hybrida—Extra selected, dark blue.....Pkt., .10
Hybrida Candissima, white.....Pkt., .10

VIRGINIA CREEPER (or American Woodbine)

Though a common native climber, this is one of the best plants for covering unsightly objects, or it may be easily trained into festoons of exceeding grace and beauty. Pkt., .10

ZINNIA. The double flowering Zinnias are among the finest annuals blooming from July till frost. The flowers are large, handsome, and in a variety of colors. Of easy cultivation in common garden soil. Seeds should be started in heat and transplanted. Our seed of these beautiful flowers is saved from the finest collection in France.

Double Mixed.....Pkt., .10

WALL FLOWER. Perennial. Deliciously fragrant and combine many shades of color; the orange, purple and chocolate predominating; tender perennial, 1½ feet.

Double MixedPkt., .10

WILD CUCUMBER. Hardy, vigorous climber, with very pretty seed-pods, large seeds; to be shown in the open ground in autumn. 20 feet. Pkt., .10

XERANTHEMUM. Profuse blooming hardy annuals with “Everlasting” flowers; useful for winter bouquets; colors pure white and deep purple. Height, 18 inches.

Finest Double Mixed.....Pkt., .10

MIXED FLOWER SEEDS FOR WILD GARDENS

A splendid mixture of more than one hundred kinds of flower seeds at a low price. Pkt., .10

Turnip	1 ounce	18 to 24 in.	6 or 7 to ft.	¼ to ½ in.	May to July.....	60 to 80 days

SUPERIOR VEGETABLE SEEDS

ASPARAGUS

German,—Gpargel.

Spanish,—Esparragos.

French,—Asperge.

One ounce for 60 feet of drill.

A convenient bed is about six feet wide, with a path two feet wide on each side. This will require six rows one foot apart, and a bed of that width, 50 feet, will be ample for an ordinary family requiring about one pound of seed. It will require about three years from the time of sowing until the bed is in full bearing, but once established, it is good for twenty years. It should be sown in drills one foot apart, and when the plants are four or five inches high they should be thinned out so that the plants will be nine inches apart from each other in all the rows. Great care must be taken for the first year to keep down all weeds as soon as they appear, else they will choke and destroy the young seedling Asparagus. The deeper the soil and the more manure used, the greater will be the crop.

Conover's Colossal. The best known and one of the most desirable sorts.

Pkt., .10; oz., .20; 1-4 lb., .60

Palmetto. Shoots are very large and light green, also tender and very desirable for the market and home garden. Very quick in growth, with close, round-topped shoots.

Pkt., .10; oz., .20; 1-4 lb., .60

Asparagus Roots

A saving of one or two years is effected by planting roots. These offered below are strong, two-year-old roots, and the proper size for testing. These roots are not carried in stock but will be shipped direct from the growers. Prices on the following varieties will be quoted on application.

Columbia, Mammoth White, Conover's Colossal, Barr's Mammoth and Palmetto.

BEANS

Dwarf or Bush

German,—Bohnen French,—Haricot
Spanish,—Frijole nano

Two pounds to 100 feet in drills or 150 hills; two bushels to the acre in drills.

A succession of sowing can be made from the first week in May until August. Plant in drills about two inches deep, and from eighteen inches to two feet apart, according to the richness of the soil; the poorer the soil the closer they can be planted. The seeds should be dropped about two inches apart.

Add .08 per Lb.; each additional pound add .01 if to be sent by mail.

J.B.R.S. Co.

Improved Golden Wax Beans

HASKELL IMPLEMENT AND SEED CO. LEWISTON MAINE

Black German Wax. (Black Seed.) Very early; round, yellow pods; a well-known standard sort.

Pound, .30; Two Pounds, .50; Fifteen Pounds, \$3.00

Curries' Rust-proof Wax. Pods long, flat and straight, very productive and rust-proof; black seed.

Pound, .30; Two Pounds, .50; Fifteen Pounds, \$3.00

Improved Golden Wax. Rust proof. An improvement on the old Golden Wax. The pod is somewhat round, meaty and entirely rust-proof.

Pound, .30; Two Pounds, .50; Fifteen Pounds, \$3.00

Green Pod Varieties

Stringless Green Pod. The pods are green, not quite as round as Valentine and less curved. The pods are stringless—absolutely—this quality at once placing the variety at top of the list among table beans.

Pound, .30; Two Pounds, .50; Fifteen Pounds, \$3.00

Long Yellow Six Weeks. Pods are long, flat, straight green.

Pound, .30; Two Pounds, .50; Fifteen Pounds, \$3.00

Low's Champion. Very productive, with stringless, large flat green pods. Excellent either as a string or shell bean.

Pound, .25; Two Pounds, .40; Fifteen Pounds, \$2.50

Dwarf Horticultural. Pods are of medium length, slightly curved, and when nearly developed are freely splashed with bright red on the yellow skin. The green shell beans are of good size, tender, and of fine flavor.

Pound, .30; Two Pounds, .50; Fifteen Pounds, \$3.00

Burpee's Bush Lima. The only Bush form of the true large Lima. Bushes grow to eighteen inches in height and always erect.

Pound, .30; Two Pounds, .50; Fifteen Pounds, \$3.50

Pole or Running

German,—Stangen Bohnen Spanish,—Judias

French,—Haricot a Rames

One Pound to 150 hills

These are more tender and require rather more care in culture than the Bush Beans, and should be sown two weeks later. They succeed best in sand loam, which should be liberally enriched with short manure in the hills, which are formed, according to the variety, from three to four feet apart. From five to six seeds are planted in each hill, about two inches deep.

Rough cedar or similar poles about seven or eight feet long should be used for these to climb on. The poles should be set in the ground at least eighteen inches, so as to prevent being blown over.

Add .08 per Lb.; each additional pound add .01 if to be sent by mail.

Kentucky Wonder Wax. Similar to the green pod Kentucky Wonder. Pods 8 to 9 inches long. Very early. **Pkt., .20; Pound, .30; Two Pounds, .50**

Lazy Wife. One of the best of the later green-podded pole beans for snaps. The pods borne in large

clusters, are five to seven inches long, broad, thick, fleshy and entirely stringless. When young they have a rich, buttery flavor, which is retained until they are nearly ripe. The dry beans are excellent for winter use. Seed white. **Pound, .30; Two Pounds, .50**

Kentucky Wonder

Kentucky Wonder. An excellent green podded variety; enormously productive, the long pods hanging in great clusters along the entire vine. Seed dark brown; entirely stringless.

Pkt., .20; Pound, .30; Two Pounds, .50

Lima, King of the Garden. Heavy cropper—bean and pod very large. **Pound, .30; Two Pounds, .55**

HASKELL IMPLEMENT AND SEED CO. LEWISTON MAINE

BEANS (Continued)

Scarlet Runners. Usually cultivated for the beauty of its scarlet flowers. Pkt., .15; ½ Lb., .25

King Horticultural, or Old Fashioned Speckled Cranberry. Pods bright carmine color; both beans and pods are much larger than the common kind.

Pkt., .20; Pound, .30; Two Pounds, .50

Improved Yellow-eye Bean. A fine field bean and very productive.

Old-fashioned Yellow-eye Bean. An excellent field bean and much preferred to the Improved Yellow-eye as a baking bean.

Red Kidney Bean. An easily raised bean and very productive. Also greatly prized by many for baking.

Pea Beans. Native grown. Used for baking more than any other pea bean.

Sulphur Pea. Larger than the white pea bean; golden yellow color; early and of fine quality.

White Kidney Bean. Good yielder. Almost entirely free from rust. One of the best baking beans on the market.

Soldier Bean. Similar in shape to the White Kidney but much larger, and with brown markings. Excellent cropper and free from rust.

PRICES ON ABOVE ON APPLICATION

BEET

German,—Runtel Rube French,—Betterave
Spanish,—Beteraga

A rather light soil, well enriched, is best suited to the cultivation of the various beets. The mangels and sugar beets in particular, require very liberal manuring. For an early crop of table beets, sow the seed as early as the ground is in condition to work; light frosts will not injure the young plants. For a main crop, sow the first of May; and for winter beets, the last of June. Sow in drills, 12 to 15 inches apart, and about one inch deep, pressing the earth firmly upon the seed,—a very important matter. Use about six pounds of seed per acre, 1 oz., 50 feet. Thin out when the plants are large enough. The varieties for table use should be left three or four inches apart.

TABLE BEETS

Crosby's Egyptian. This variety is as early as the original Egyptian, but by careful selection has been made thicker and of better quality.

Pkt., .10; oz., .15; ¼ lb., .40; lb., \$1.00

Dewing's Early. Of deep red color, smooth and of fine form. One of the leading varieties, both for market and for family use.

Pkt., .10; oz., .15; ¼ lb., .40; lb., \$1.00

Detroit Dark Red Turnip. An excellent beet for bunching for market; tops exceptionally small and upright; roots turnip shaped with small tap root. Color of skin dark blood red; flesh bright red. Quality is of the best, sweet and tender. One of the best varieties for the market gardener and the home garden.

Pkt., .10; oz., .15; ¼ lb., .40; lb., \$1.00

Early Eclipse. Very early, dark-red color, small top, and free from fibrous roots.

Pkt., .10; oz., .15; ¼ lb., .40; lb., \$1.00

Edmand's. This variety is thoroughly fixed and uniform in type. The flesh is deep blood red in color, and exceedingly sweet and tender. It is round, smooth, of good market size, and does not grow over-large.

Pkt., .10; oz., .15; ¼ lb., .40; lb., \$1.00

Haskell's Special Blood Turnip. We have a very fine strain of Blood Turnip Beet, of the Edmand's type. Very deep red fleshed so much in demand in all markets.

Pkt., .10; oz., .15; ¼ lb., .40; lb., \$1.00

Swiss Chard or Silver Sea Kale. Used as greens and the ribs of leaves cooked and served as asparagus.

Pkt., .10; oz., .15; ¼ lb., .50; lb., \$1.25

MANGEL-WURZEL AND SUGAR BEETS

Sow in April or May, using eight to twelve pounds to the acre.

Price of all varieties. Oz., .15; ¼ lb., .30; lb., .75

BEETS (Continued)

Improved Mammoth Long Red. An improvement on the old variety. The roots are very large, uniformly straight and well formed; proportionately thicker, and are deeper colored than the common sort, and with smaller tops.

Golden Tankard. Flesh a deep, rich yellow; very sweet and nutritious. Half long in shape. A very heavy cropper.

Norbiton Giant. A mammoth, long-red variety, enormously productive, and keeps well; good for deep soils.

Lane's White Sugar. One of the best for feeding stock. Very sweet.

Mangel Danish Sludstrup. Long, reddish yellow. Grows well above the ground and easy to pull. More percentage of dry matter than in any known Mangel. Very heavy cropper.

CABBAGE

German,—Kopf-Kohl French,—Chou Pomme
One ounce of seed produces about 3,000 plants.

Early varieties are grown from seed sown in hot-beds in February or March, only moderate bottom heat being required. Transplant into other frames

Danish Ball Head Cabbage

without much, if any, bottom heat, as soon as the plants show the fourth leaf. In April, or as soon as the ground can be easily worked, set out in rows three feet apart, and about eighteen inches between the

plants. The ground should be thoroughly stirred with cultivator and hoed every week till the plants cover the ground. For a fall crop, sow in the open

Chinese Cabbage

ground in May, in hills the proper distance apart, using a liberal quantity of manure in the hill, besides that which is plowed in; thin out to one good plant in each hill. In the same way crops may be sown to lay in for winter use, planting seeds as late as July 1. Seeds can also be sown in shallow drills; when the plants are large enough, can be transplanted, setting the plants in rows three feet apart and two feet apart in the row. If the young plants are troubled with the cabbage fly, sprinkle them with tobacco dust, air-slaked lime, slug-shot or wood ashes, while the dew is on them.

Chinese Cabbage (Chihli). Earliest and most sure heading of the Chinese varieties. Produces long, solid white heads nearly two feet in length.

Pkt., .10; oz., .40; ¼ lb., \$1.50

Danish Ball Head. The wide and unfailing popularity of the Danish Ball Head cabbage is simply wonderful. It seems to adapt itself to all soils and conditions.

It is a medium to late cabbage, but is generally grown as a late crop. It is sure to head, the heads being round, hard and extremely heavy, though not

AMOUNT ENCLOSED
Check, Money Order or Stamps \$_____

[illegible]

CABBAGE (Continued)

extra large. It can be grown in close quarters, on account of its compact habit.

Pkt., .10; oz., .40; $\frac{1}{4}$ lb., \$1.50

All Seasons. An early Drumhead, sure heading, solid variety. Desirable for early or fall use.

Pkt., .10; oz., .40; $\frac{1}{4}$ lb., \$1.25

Copenhagen Market. Extra early variety, ball shaped and evenly maturing. Best for market gardeners.

Pkt., .10; oz., .40; $\frac{1}{4}$ lb., \$1.50

Charleston Wakefield. Grows to a much larger size than the Jersey Wakefield. Very productive and good shipping variety.

Pkt., .10; oz., .40; $\frac{1}{4}$ lb., \$1.25

Early Jersey Wakefield. A standard early variety for home use or market.

Pkt., .10; oz., .40; $\frac{1}{4}$ lb., \$1.25

Early Winningstadt. An early variety of excellent quality, not as early as the Wakefield.

Pkt., .10; oz., .40; $\frac{1}{4}$ lb., \$1.25

Enkhuizen Glory. It is an early cabbage, but still of large size, solid and of the best quality. It is one of the largest early cabbages we have seen, and may be set out as late as the last of July or first of August in this latitude, and will make large, fine heads for late fall or winter use. The great merit of this cabbage lies in the perfect uniformity of its growth. The plants are compact, have few outside leaves, can be planted close together, and will produce a very large crop.

Pkt., .10; oz., .40; $\frac{1}{4}$ lb., \$1.50

Henderson's Early Summer. A standard summer variety. We have the true stock.

Pkt., .10; oz., .40; $\frac{1}{4}$ lb., \$1.25

Mammoth Rock Red. The largest heading of any of the red sorts, of deep rich color, and excellent quality.

Pkt., .10; oz., .40; $\frac{1}{4}$ lb., \$1.25

Red Dutch for pickling or for salads.

Pkt., .10; oz., .40; $\frac{1}{4}$ lb., \$1.25

Savoy Improved American. The finest flavored of all the cabbage family, large and solid.

Pkt., .10; oz., .40; $\frac{1}{4}$ lb., \$1.25

Succession. A sure-headed, long-keeping variety, very similar to All Seasons, but maturing a little later. Heads deep and very firm.

Pkt., .10; oz., .40; $\frac{1}{4}$ lb., \$1.25

Sure Head. A fine variety for main crop. A good shipper and sure header.

Pkt., .10; oz., .40; $\frac{1}{4}$ lb., \$1.25

Warren's Stone Mason. An improvement on the Stone Mason Drumhead; heads rounder, firmer and earlier; is an extra good keeper.

Pkt., .10; oz., .40; $\frac{1}{4}$ lb., \$1.25

BROCCOLI

A vegetable similar in habit to the cauliflower. It is getting to be a very popular vegetable. In cooking it is treated the same as spinach.

Italian Green Sprouting. This variety has a central head. When this is cut the side branches produce small, compact flower clusters.

Pkt., .20; oz., \$1.50

BRUSSELS SPROUTS

(Species of cabbage; cultivation the same)

German,—Rofen-Kohl French,—Chou de Bruxelles
Spanish,—Berza de Brussels

One ounce will sow a bed of forty square feet, and produce about 3,000 plants

This is a delicious vegetable, superior to either borecole or spinach. The small, cabbage-like heads which grow upon the stem are much improved by a moderate frost. Sow in hotbeds in March or April, and in the open ground in May.

Dwarf Improved. Produces excellent, compact sprouts; very sure cropper.

Pkt., .10; oz., .20; $\frac{1}{4}$ lb., .75

CAULIFLOWER

German,—Blumenkohl Spanish,—Coliflor
French,—Chou-fleur

One ounce of seed will produce 1,500 to 2,000 plants if sown in open ground, or about 3,000 in frames

To raise good Cauliflower there is nothing so essential to success as good seed. The best Cauliflower seed is very expensive, but it is worth to the grower ten times as much as cheap and carelessly grown seeds. The best results are obtained from using Snowball for main late crop, as well as for early use.

The seed should be sown in open ground or cold frames about the middle of May or first of June, on good soil. When plants are large enough, transplant to rich, moist soil. These remarks refer to Snowball for main late crop, as well as for early use.

Henderson's Early Snowball. This is undoubtedly the finest ever introduced. It is the earliest and produces beautiful snow-white heads of the most delicious flavor. The seed we offer is pure and genuine, and sure to prove satisfactory.

Pkt., .20; oz., \$2.50

Extra Selected Dwarf Early Erfurt. The finest strain of the Erfurt Cauliflower; almost as early as the Snowball; grows about 15 inches high; producing very solid, pure white heads of the very finest quality; seldom fails to form a good sized head.

Pkt., .20; oz., \$2.50

All kinds of Insecticides. Spray Pumps, Power Sprayers, etc., always on hand. Call and examine or write for catalogue and prices.

CARROT

German,—Rhore French,—Carrotte
Spanish,—Zanahoria

One ounce will sow 100 feet of drill; 3 pounds required for an acre

Carrots require a very finely pulverized soil to grow them to perfection. A good, light and well-enriched sandy loam is the best for this crop. For field culture, sow in drills 2 ½ feet apart, so as to cultivate by horse. Market gardeners sow in drills about 15 inches apart and cultivate by hand. For early crops cover ½ inch deep, and thin to 6 inches apart in the rows; for late, cover ¾ inch deep, and thin to 4 inches.

Danvers Half-Long. One of the heaviest croppers; roots dark orange color, 8 to 10 inches in length, and ending in a somewhat abrupt point; first class for all soils.

Pkt., .10; oz., .20; ¼ lb., .60

Oxheart, or Guerande. Roots short and very thick, and intermediate between Scarlet Horn and Chantenay; color deep orange; fine grained.

Pkt., .10; oz., .20; ¼ lb., .60

Improved Long Orange. The best known and most largely cultivated of any Carrot; excellent for stock or table use. Roots deep orange, 12 to 15 inches long.

Pkt., .10; oz., .20; ¼ lb., .60

Hutchinson. Very productive. Roots nearly cylindrical in form, 10 to 12 inches in length and ending in an abrupt stump root. Largely grown in New England.

Pkt., .10; oz., .20; ¼ lb., .60

Chantenay. One of the best varieties for the market or home garden. Our seed is of the coreless type with a reddish center. It is half long and stump rooted and grows from 6 to 7 inches long.

Pkt., .10; oz., .20; ¼ lb., .60

Cress or Peppergrass

German,—Areffe French,—Cresson
Spanish,—Masuerzo

One ounce will sow 16 square feet, or 150 feet of drill

A popular salad, which should be sown early in the spring—very thickly in shallow drills—and at short intervals, for success, as it soon runs to seed.

Extra Curled. A small plant, having a fine pungent flavor, and used as a salad; may be cut two or three times.

Pkt., .10; oz., .15; ¼ lb., .35

True Water Cress. Grows along the banks of ponds and streams, and is easily introduced, wholly unlike Extra Curled; leaves are quite large and thick; a fine salad, sold in immense quantities in the large markets in spring.

Pkt., .10; oz., .60; ¼ lb., \$1.25

Danvers Half-Long Carrot

CELERY

German,—Sellerie French,—Celeri Spanish,—Aplo

One ounce will produce 3,000 plants

Sow seed the first or second week in April in hotbed or cold frame. As soon as the plants have attained a height of three inches transplant, setting them four inches apart. As fall approaches draw earth up to the plants, keeping the stalks well together. When well blanched it is ready for use. Some of the varieties, such as Golden Self-Blanching and White Plume, may be blanched by simply placing a board 12 to 15 inches wide on edge on each side of the row.

Giant Pascal. A strong grower and wonderful keeper. Quality very fine.

Pkt., .10; oz., .50

Golden Self-Blanching. A self-blanching early golden-colored variety that is very popular.

Pkt., .10; oz., .75

White Plume. A variety that can be more easily grown than any other, as it does not require high banking to blanch the stalks. Simply earthing up enough to keep the stalks together or by passing a string around each plant is sufficient.

Pkt., .10; oz., .50

CHERVIL

One ounce will sow about 300 feet of drill

Cultivated like parsley. Sow thickly in May, in drills half an inch deep, one foot apart. Use while the leaves are young and tender.

Curled Chervil. The young leaves are used for garnishing, and flavoring soups.

Pkt., .10; oz., .20; ¼ lb., .45

CORN - Sugar

German,—Welfchkorn Spanish,—Maiz French,—Mais
One Half Pound will plant 50 hills; 12 Pounds will
plant one acre in hills

Corn requires a good soil and a warm situation. Commence for first early by planting the early varieties about May 1, and if a continuous supply is wanted all summer, make plantings about two weeks apart from May 1 until the last of July, first planting early varieties, then later ones. Plant in rows 3 feet apart, and make the hills about the same distance apart in the rows. Five kernels in the hills are plenty. Cover about 1 inch deep for early and a little deeper for late. Thin to 3 plants in a hill. Add 6 cents per lb. and for each additional lb. to the same address add 1c, if to be sent by mail.

Crosby's Early. An early corn of large size and choice quality. It has long been a standard variety.

½ lb., .15; 1 lb., .25; 2 lbs., .45; 12 lbs., \$2.50

Early Red Cory. This variety is the favorite for first early.

½ lb., .15; 1 lb., .25; 2 lbs., .45; 12 lbs., \$2.50

White Cob Cory. This is an improvement over the Early Cory as the cob is white, which gives it a finer appearance. It is as early as the Early Cory and of excellent quality.

½ lb., .15; 1 lb., .25; 2 lbs., .45; 12 lbs., \$2.50

Golden Bantam. The fact that the grains of this variety are yellow is an indication of hardiness and its value for early planting and early maturity. It is a rapid grower, and produces ears measuring about 5 inches, but the smallness of ears is fully made up by the deliciously sweet flavor and tender quality of the corn when cooked. It is a fine variety for the home garden. ½ lb., .15; 1 lb., .25; 2 lbs., .45; 12 lbs., \$2.50

Golden Sunshine. The earliest of yellow sweet corn varieties. Very fine quality. Ears 6 inches long with 12 rows of large kernels. About 10 days earlier than Golden Bantam.

½ lb., .15; 1 lb., .25; 2 lbs., .45; 12 lbs., \$2.50

Bantam Evergreen. Later than the Golden Bantam. Ears 8 inches long. 12 to 14 rowed. Of a rich golden yellow color and fine quality.

½ lb., .15; 1 lb., .25; 2 lbs., .45; 12 lbs., \$2.50

Black Mexican. This corn when in condition for the table cooks remarkably white; but the ripe grain is black or bluish-black. It is surpassed by none in tenderness.

½ lb., .15; 1 lb., .25; 2 lbs., .45; 12 lbs., \$2.50

Golden Bantam

FIELD AND FODDER CORN

Prices will be quoted on application on the following corns. Please give the amount desired as well as the kind in all cases.

Leaming. An early, very heavy, long-eared corn. Grows to medium height with large amount of foliage.

One of the best ensilage corns, very much relished by stock. Cob red, grain yellow.

Red Cob. A very large-growing white dent corn, with red cob. Fodder sweet, juicy and tender. Very popular in northern dairy districts.

Eureka. One of the tallest and best ensilage corns grown. Grows very tall and is very productive of ears and leaves. For the silo this corn is rarely equalled.

CORN (Continued)

Sanford. A well-known variety, adapted to the whole of New England. Kernels silvery white flint color; large and broad. An excellent fodder and ensilage corn.

Early Canada. An eight-rowed, yellow flint variety with small cob and deep grain. This is one of the

earliest and best and seldom fails to produce a crop. The Early Canada seed we have to offer was grown in this State.

Prizetaker. A very large growing, yellow flint corn. Ears are eight-rowed, long, and the kernels deep and broad. One of the very best for ensilage as it ears out well.

White Spine Cucumber

CUCUMBER

German,—Gurfe

French,—Concombre

Spanish,—Pepino

One ounce will plant 50 hills; 2 pounds will plant an acre

Cucumbers being a tender annual should not be planted out of doors until all danger from frost is passed and the ground is warm. They succeed best in warm, moist, rich loamy soil. The hills should be 3 to 4 feet apart and the plants thinned to four of the strongest to a hill.

Extra Early Russian. Earliest variety known; hardy and productive. Fruit very small and quality fine for pickling and slicing.

Pkt., .10; oz., .20; ¼ lb., .60

Early Cluster. Fruit borne in pairs; light green; a great bearer.

Pkt., .10; oz., .20; ¼ lb., .60

Boston Pickling. Fruit short, smooth and pointed at each end, bright green and a great yielder; one of the best pickling.

Pkt., .10; oz., .20; ¼ lb., .60

Early Fortune. An early variety, very productive, and of large size. Dark green in color which does not fade. The shape is uniform and the quality very fine.

Pkt., .10; oz., .20; ¼ lb., .60

White Spine Improved. The most popular strain of White Spine, and for general out-door culture, the best.

Pkt., .10; oz., .20; ¼ lb., .60

Long Green Improved. Fine for pickling when small; good for table use when about half grown.

Pkt., .10; oz., .20; ¼ lb., .60

Japanese Climbing. Vines are extra strong and foliage much more vigorous than other kinds, and being a climbing sort, can be grown on trellises, etc., saving much valuable space in small gardens. It is very prolific, from forty to fifty cucumbers having been counted on single plants. Fruit cylindrical, about ten inches long, thick and of fine flavor.

Pkt., .10; oz., .20; ¼ lb., .60

Davis Perfect. Long and slim. Sometimes measuring 12 inches in length. Very tender and of fine quality.

Pkt., .10; oz., .20; ¼ lb., .60

DANDELION

German,—Lowenzahn French,—Pissenlit
Spanish,—Amargon

One ounce will sow 100 feet of drill

The Dandelion resembles endive, and affords one of the earliest as well as one of the most healthful spring greens. Sow as early as the weather will permit, in good, well-enriched soil, in rows 12 inches apart, covering seed $\frac{1}{4}$ of an inch deep, and firming the soil well over them. Thin to two or three inches apart in the rows; by so doing the roots will be larger and a great amount of time will be saved the next spring in trimming or gathering the crop. One pound per acre is sufficient.

Improved Thick-Leaved. Cultivate for spring greens; an immense improvement on the common dandelion, both in size and thickness of its leaves and fine flavor, being far less bitter. Pkt., .10; oz., .75; $\frac{1}{4}$ lb., \$2.50

EGGPLANT

German,—Gierpanze French,—Aubergine
Spanish,—Berengena

The Eggplant will thrive well in any good garden soil, but will repay good treatment. The seeds should be sown in hotbed or warm greenhouse in March or

Kale

April, and when about an inch high potted in two-inch pots. Plant about June 1, two and one-half feet apart.

New York Improved Purple. The leading market variety, and undoubtedly the best for size, quality and productiveness. Pkt., .10; oz., .60

ENDIVE

German,—Gendive French,—Chicoree
Spanish,—Endivia

Endive

One of the most refreshing and attractive of all autumn and winter salads. Sow seed from the middle of June until the end of August.

Moss Curled. More finely curled, and a heavier and more dense plant than Green Curled.

Pkt. .10; oz., .20; $\frac{1}{4}$ lb., .75

Broad-leaved Batavian (Escarolie). This variety is chiefly used in soups and stews; requires to be tied up in blanching.

Pkt., .10; oz., .20; $\frac{1}{4}$ lb., .75

KALE or BORECOLE

German,—Blatter-Kohl French,—Chou Vert
Spanish,—Breton

One ounce will produce 3,000 plants

Sow from the middle of April to the beginning of May in prepared beds; transplant in June, and treat in the same manner as for cabbage. Of all the cabbage tribe this is the most tender and delicate. The varieties are all extremely hardy, and are best when touched by frost.

Tall Curled Scotch. Plants of this variety grow two to three feet in height, bearing long, plume-like, light green leaves which are much cut and deeply curled at the edges. Very hardy.

Pkt., .10; oz., .20; $\frac{1}{4}$ lb., .75

Dwarf Green Curled Scotch. Rarely exceeding 18 inches in height, but spreading out under good cultivation to 3 feet in diameter; leaves beautifully curled and bright green.

Pkt., .10; oz., .20; $\frac{1}{4}$ lb., .75

KOHL RABI

German,—Rohl-Rab

French,—Chou-Rave

Spanish,—Col de nabo

One ounce will sow 200 feet of drill

This vegetable, the popularity of which is rapidly increasing, combines the virtues of the turnip and cabbage, but excels both in nutritive, hardy and productive qualities. The seed may be sown in June in rows 18 inches apart, and the plants thinned out to eight or ten inches in the rows.

Purple Vienna. A little later than the White; color bluish purple. Pkt., .10; oz., .25; ¼ lb., .75

Large Green or White. Good for table and also for feeding stock. Pkt., .10; oz., .25; ¼ lb., .75

LETTUCE

German,—Lattich

French,—Laitue

Spanish,—Lechnga

One ounce will sow 120 feet of drill

Requires a rich, moist soil, and to be crisp and tender needs to be grown in cool weather. For winter use, sow in hotbeds every two weeks, at the rate of one ounce of seed to four sashes (a sash is three feet long by six feet wide); cover very lightly, and transplant, first to three inches apart each way, afterward to eight inches. For garden or field, sow in rows, cover one-fourth of an inch deep and thin out to 12 inches apart in the rows. For New England the White Seeded Tennisball for cultivation under glass, and the Black Seeded Tennisball for outdoor use are the standard varieties.

Grand Rapids

Grand Rapids. An excellent forcing variety with loose heads and of good size and form.

Pkt., .10; oz., .20; ¼ lb., .60

Big Boston. A most desirable variety, either for forcing in cold frames or open ground planting; always produces large, solid, saleable heads.

Pkt., .10; oz., .20; ¼ lb., .60

May King

May King. Probably the finest all-seasons lettuce yet introduced. It is very early and hardy, and will stand cold, damp weather better than many varieties. Planted out of doors or under glass it will produce fine solid heads much sooner than any other variety. Outer leaves are yellowish green, tinged with brown, while the inside is a rich yellow.

Pkt., .10; oz., .20; ¼ lb., .60

Boston Curled. Of ordinary quality but great beauty; highly ornamental in growth with its frilled leaves.

Pkt., .10; oz., .20; ¼ lb., .60

Prize-Head Early. Leaves green and red, very thin, crisp and tender. One of the best for private use.

Pkt., .10; oz., .20; ¼ lb., .60

Tennisball, Black-Seeded. A very popular sort for open-ground culture; forms a handsome head, and is crisp and tender.

Pkt., .10; oz., .20; ¼ lb., .60

Simpson Early Curled (White Seed). A leading early sort for forcing or open ground.

Pkt., .10; oz., .20; ¼ lb., .60

Tomhannock. A variety with upright leaves, beautifully wrinkled, edges of outer leaves have reddish tinge; one of the best.

Pkt., .10; oz., .20; ¼ lb., .60

Iceberg. A large, late, cabbage heading variety. Heads very firm and well blanched. Color, medium green.

Pkt., .10; oz., .20; ¼ lb., .60

Hanson. Large, solid heads; tender, crisp and of a fine flavor.

Pkt., .10; oz., .20; ¼ lb., .60

**KEEPS
FARM TOOLS
SHARP**

A better edge~ quicker

HERE is one of the most useful tools that you can own. The Carborundum No. 57 File will sharpen about every farm or garden tool.

Quickly puts a keen edge on your mower section knives. No need to remove blades. Just the shape and size to do the job right. Keeps the knives in perfect cutting shape with just a few strokes. Carry one in your mower tool box. Touch up the section knives every once in a while and note how much better your mower works.

Use it for quickly putting an edge on scythes or grass hooks. Use it for sharpening spades, lawn edgers, axes, hatchets—in fact, almost any edge tool of the farm or garden.

The Carborundum No. 57 File is a four sided, tapered shaft of genuine Carborundum—the hardest, sharpest, fastest cutting of all materials. Thirteen inches long, fitted with a wood handle and made in just the right grit to give the best results.

*Sold by Dealers everywhere.

COMBINATION FILE

NO 75

SOME prefer to have a combination file—that is, one having a fine grit side and a coarse grit side. So here it is in the Carborundum No. 75 File.

With the coarse side you can do the heavy sharpening—that is, taking out the nicks and bringing the tool to an edge. With the fine side you can give a fine, smooth, keen edge. You can use it on all sorts of farm and garden tools—just the same as the 57 File. It simply has the added advantage of the two grit feature.

HASKELL IMPLEMENT & SEED CO.

LEWISTON, MAINE

LEEK

German,—Lanch French,—Poireau
Spanish,—Puerro

One ounce will plant 200 feet of drill

The leek is very hardy and easily cultivated; it succeeds best in a light but well-enriched soil. Sow as early in the spring as practical in drills one inch deep and one foot apart. When six or eight inches high they may be transplanted in rows ten inches apart each way as deep as possible, that the neck, being covered, may be blanched.

American Flag Pkt., .10; oz., .25; ¼ lb., .75

Musk Melon

MELON, MUSK

German,—Melone French,—Melon
Spanish,—Melon

One ounce will plant about 50 hills (2 to 3 pounds in hills) per acre

Melons thrive best in a light, rich soil. Plant early in May, when the ground has become warm and dry, in hills six feet apart each way for Muskmelons; eight feet for Watermelons. Previous to sowing the seed mix a few shovelfuls of well-rotted manure in each hill, and plant in each twelve to fifteen seeds; after all danger of bugs is over, thin out to three plants per hill. When about one foot long, pinch off the tips to make them branch, as it strengthens the growth of the vines and makes the fruit mature earlier. Feed liquid manure occasionally. A few hills for early use may be had by sowing on pieces of sod in a hotbed, and when warm enough transplant to open ground.

Emerald Gem Melon. The Emerald Gem is entirely unlike any other muskmelon yet introduced. The melons are about the size of the Netted Gem, but un-

like that variety, the skin, while ribbed, is perfectly smooth, and of very deep emerald green color. The flesh which is thicker than any other native melon of the size, is of a suffused salmon color, and ripens thoroughly to the thin green rind, which is distinctly defined. The flesh is peculiarly crystalline in appearance, and so very juicy, sweet and rich that it almost drops to pieces. It matures very early and is quite productive.

Pkt., .10; oz., .20; ¼ lb., .50

Long Yellow Musk. A long, large melon with a musky flavor; rich, yellow color, both inside and out.

Pkt., .10; oz., .20; ¼ lb., .50

Rocky Ford. This new Muskmelon is similar to the royal strain of Netted Gem. The strain here offered originated with the melon growers in the vicinity of Rocky Ford, Col., who have shipped this melon from that distant Western point to Eastern markets

Pkt., .10; oz., .20; ¼ lb., .50

Bender's Surprise. A delicious medium sized melon. Slightly oblong in shape. Deeply ribbed. Flesh thick, solid and juicy, and of a deep salmon color.

Pkt., .10; oz., .20; ¼ lb., .50

Early Hackensack. An improvement over the old Hackensack, producing melons of as good quality and ten days earlier. Large fruit with thick, green flesh of the finest flavor.

Pkt., .10; oz., .20; ¼ lb., .50

MELON, WATER

German,—Waffermelone Spanish,—Zandia

French—Melon d'Eau

One ounce will plant 50 hills

Prices on all varieties of Watermelons as follows:
.10 per pkt.; .15 per oz.; ¼ lb., .40.

Cole's Early. An excellent variety. One of the earliest. Hardy, medium size, nearly round, dark green, striped a lighter shade; flesh deep pink.

Phinney's Early. This is another early melon of fine quality; suitable for growing in New England. Medium size, oblong in form, mottled green; flesh bright scarlet and very sweet.

Citron for Preserves. The old and well-known Preserving Citron; seeds red.

MUSTARD

German,—Senf

French,—Moutarde

Spanish,—Mostaza

One ounce will sow 75 feet of drill

As an ingredient, the green Mustard imparts a delightfully pungent flavor to the various forms of prepared salads. For early crops the seed may be sown in a hotbed in March, and for general crop at frequent intervals through the spring, in drills from eight to twelve inches apart.

White London. Considered the best for salads and spinach; leaves light green. It is best when about four inches high. Oz., .10; ¼ lb., .15

ONION

German,—Zwiebel

French,—Ognon

Spanish,—Cabolla

Select the cleanest, richest land on the farm for the Onion crop. If onions were grown on the land the previous year, so much the better, but any good corn or potato land will do. Broadcast fifteen to twenty cords of fine, well-rotted manure to the acre and plow not deeper than six inches; harrow thoroughly, cross plow, and harrow again, after which hand rake with wood rake and remove stones and rubbish. Sow four to five pounds of seed per acre in drills twelve to fourteen inches apart and about one-half inch deep. See that the Seed Drill is equipped with a good roller that will

Yellow Globe Danvers

press the earth firmly upon the seed. Sow as early in the spring as the ground can be properly worked. There is seldom necessity for thinning Onions if the

land has been properly manured and seeded. After the Onions are three to four inches high, an application of about five hundred pounds to the acre of fertilizer, rich in available nitrogen, strewn between the rows, will be very beneficial. Keep the Onions growing by never allowing the weeds to get ahead and the acre should produce in a good average season, five hundred to seven hundred bushels. When the tops are down, the Onions may be pulled and left on the ground, and should be frequently turned with a wooden rake until tops are dried.

ONION SETS

Onion sets should be planted as early in the spring as convenient to obtain early green onions, but they may be set at any time up to June 1. Set in rows a foot apart and three to four inches between them in the row. Any good soil will suit them. When grown in quantities, high cultivation is given in order to forward the crop for an early market. They are ready for use as soon as the bulbs begin to be of fair size. Those not used in green condition will ripen early in July and make nice onions. Potato and Top onions are grown from bulbs only.

Potato Onion Sets.....	lb., .30; 8 lbs.,	\$1.75
Red Bottom Sets	lb., .30; 8 lbs.,	1.75
White Bottom Sets.....	lb., .30; 8 lbs.,	1.75
Yellow Bottom Sets	lb., .30; 8 lbs.,	1.75
Top Sets	lb., .30; 8 lbs.,	1.75

Yellow Globe Danvers. Undoubtedly the best known and most popular of all onions; the earliest yellow variety; is entirely free from stiff necks. Globular in shape; has a small top. It is the most productive onion grown. Pkt., .10; oz., .40; ¼ lb., \$1.00

Large Red Wethersfield. We have a very fine and select strain of this sort. Color is deep purplish red, flesh white, moderately grained and very firm. Yields enormously and is one of the best winter keeping onions. Pkt., .10; oz., .40; ¼ lb., \$1.00

White Portugal, or Silverskin. A large, flat, white onion of mild and pleasant flavor; hard and fine grained, and a good keeper. Extensively sown for sets, and is also largely grown for pickling. Pkt., .10; oz., .40; ¼ lb., \$1.00

Prize-Taker. A globe-shaped variety of delicate straw color, growing to a very large size. It ripens up hard and firm, the flesh being pure white. Fine grained and of fine, mild, delicate flavor. Pkt., .10; oz., .40; ¼ lb., \$1.00

Buy one of our Garden Seeders. You can save the price of it in one season in time and seed. It is the most economical of seeders made. Send for catalog and prices.

PEAS

German,—Erbren French,—Pois
Spanish,—Guizante

One pound for 50 feet of drill; one to
two bushels in drills for an acre

Peas come earliest to maturity in light, rich soil. For general crop, a deep loam or a soil strongly inclined to clay is best. For early crops decomposed leaves or leaf-mold should be used; or, if the soil is very poor, strong manure may be used. For general crops a good dressing should be applied, and for the dwarf-growing kinds the soil can hardly be too rich. When grown as a market crop, peas are never staked; for private use they are generally sown in double rows, and the tall varieties staked up by brush. For an early crop sow as soon as the ground can be worked, and make repeated sowings every two weeks for succession. After the first of June, sowing should be discontinued until the middle of August, when a good crop may sometimes be secured by sowing an extra-early sort for fall use.

If sent by mail add .08 per lb.; and for each additional lb. to the same address add .01.

All marked thus (*) indicate wrinkled varieties.

Extra Early Dwarf Varieties

***Notts Excelsior.** This is the earliest dwarf wrinkled pea. The plant is dwarf and needs no support. The pods are of good size and well filled with large peas of the finest quality. It is as early as the American Wonder, while the vines are much more productive and the pods of larger size. There is no better early dwarf pea. Fifteen inches.

Lb., .30; 2 lbs., .50; 14 lbs., \$3.00

***Sutton's Excelsior.** Ripens early on vines fourteen to sixteen inches high, covered with a great abundance of long, straight, broad pods of a pale green color.

PriceLb., .30; 2 lbs., .50; 14 lbs., \$3.00

***Laxtonian.** One of the best dwarf wrinkled peas for the market gardener. Pods about 4 inches long, resembling those of Gradus, but ripening a little earlier. Vines productive and vigorous; average height less than 18 inches. Lb., .30; 2 lbs., .50; 14 lbs., \$3.00

***Pioneer.** An improvement on the popular Laxtonian. Vines about 20 inches high; color, light green.

Laxtonian

Vigorous growth. The pods pointed and a little darker in color than the vine. Considered fully four days earlier than the Laxtonian.

Lb., .30; 2 lbs., .50; 14 lbs., \$3.00

***Blue Bantam.** A splendid large podded dwarf variety of the Laxtonian class. Vines about 15 inches high. Pods deep green, about 4 inches long. Fine quality.

Lb., .30; 2 lbs., .50; 14 lbs., \$3.00

***Peter Pan.** One of the very finest of the large podded dwarf variety of the Laxtonian class, though somewhat earlier. Vines 15 inches. Pods straight and pointed. Quality best.

Lb., .30; 2 lbs., .50; 14 lbs., \$3.00

Extra Early Variety Not Dwarf

Alaska. An extra early round pea bearing pods of a dark green color; two feet.

Lb., .30; 2 lbs., .50; 14 lbs., \$3.00

***Gradus or Prosperity.** It combines the finest quality with extreme earliness, and is also productive, bearing pods fully as large as Telephone. The color of the shelled peas is a beautiful light green, which color they retain after being cooked; the quality and

PEAS (Continued)

flavor delicious, and the peas remain tender and sweet for a long time.

Lb., .30; 2 lbs., .50; 14 lbs., \$3.00

Sutton's Excelsior

***World's Record.** An improved type of Gradus, being slightly earlier, more dwarf and very productive. Height, 2 feet. Pods medium green, 4 inches long. Very fine quality. Lb., .30; 2 lbs., .50; 14 lbs., \$3.00

***Thomas Laxton.** One of the very best of the tall growing, large pod, early peas. The plant is a very hardy and strong grower, producing extra large pods in abundance. The quality is delicious and cannot be surpassed by any other variety. The "Thomas Laxton" will mature nearly as early as any of the extra early smooth peas, and being a wrinkled sort is much sweeter. Lb., .30; 2 lbs., .50; 14 lbs., \$3.00

***Early Morn.** One of the earliest and most productive. The pods are very large and well filled. Very fine flavor. Lb., .35; 2 lbs., .60; 14 lbs., \$3.50

Second Early Varieties

***Telephone.** A pea of the finest quality, sweet and delicious. Medium late, growing four feet tall with pods of the largest size.

Lb., .30; 2 lbs., .50; 14 lbs., \$3.00

***Bliss Everbearing.** Medium late and very productive. Two feet tall.

Lb., .30; 2 lbs., .50; 14 lbs., \$3.00

***Dwarf Telephone (Carter's Daisy).** Similar to the Tall Telephone except in the height of the vine, which is only about two feet.

Lb., .35; 2 lbs., .60; 14 lbs., \$3.50

Late Variety for General Crop

***Champion of England.** The standard for quality. Grows four feet tall, very prolific, and still one of the best late peas. Lb., .30; 2 lbs., .50; 14 lbs., \$3.00

White Marrowfat. A good late sort. Cultivated very extensively for the summer crop.

Lb., .25; 2 lbs., .45; 15 lbs., \$2.40

Black-Eyed Marrowfat. An old and standard late variety for garden or field use.

Lb., .25; 2 lbs., .45; 15 lbs., \$2.40

Canada Field. Seeds small white; for field culture only; largely used for sowing among oats. Price

Lb., .10; 15 lbs., \$1.35

PUMPKIN

German,—Kurbis

French,—Potiron

Spanish,—Cabbage

One ounce will plant 20 hills

Pumpkins are grown chiefly as food for stock. The usual method of planting is to scatter a few seeds at

Sugar Pumpkin

intervals in the hills when planting Indian corn; in this way good crops of pumpkins are secured with

PUMPKINS (Continued)

slight labor and expense, and make a valuable addition to the season's crops.

Connecticut Field. The common yellow pumpkin grown chiefly for feeding stock.

Pkg., .10; oz., .15; ¼ lb., .30; lb., \$1.00

Sweet or Sugar. A small variety, fine-grained and sweet; the best for table use.

Pkg., .10; oz., .15; ¼ lb., .35; lb., \$1.25

Moss Curled

PARSLEY

German,—Peterfile

French,—Persie

Spanish,—Perejil

One ounce for 150 feet of drill

Parsley succeeds best in rich, mellow soil. As the seed germinates very slowly, it should be sown early in spring, previously soaking the seed for a few hours in tepid water. Sow thickly in rows a foot apart and half an inch deep.

Champion Moss Curled. The standard variety.

Pkt., .10; oz., .20; ¼ lb., .50

PARSNIP

German,—Pastinake

French,—Panaïs

Spanish,—Pastinaca

One ounce for 150 feet of drill; five pounds in drills for an acre

Sow in drills as early in spring as the weather will admit, fifteen inches apart, covering half an inch deep. When well up, thin out to five or six inches apart in the rows. Unlike carrots, they are improved by frost, and it is usual to take up in the fall a certain quantity for winter use, leaving the rest in the ground till spring, to be dug as required.

Prices on all varieties of parsnips as follows:

Pkt., .10; oz., .20; ¼ lb., .50; prices in quantity on application.

Abbott's Improved Hollow Crown. Smooth and quite large; fine sort.

Guernsey. Roots not quite so long as Hollow Crown, but of greater diameter and more easily gathered.

Long Smooth. As name implies, very smooth, free from roots, and a general favorite.

PEPPER

German,—Pfeffer

French,—Piment

Spanish,—Pimiento

One ounce will produce 2,000 plants

Grown largely for pickles. Sow in hotbeds early in April, and transplant to the open ground when the weather is favorable. They should be planted in warm, mellow soil in rows 18 inches apart. They may also be sown in the open ground when danger of frost is past.

Large Bell, or Bull Nose. A favorite and well-known pickling sort. Is early, large, mild and thick skinned.

Pkt., .10; oz., .50

Long Red Cayenne. A small, long, bright red sort, very productive; extremely strong and pungent.

Pkt., .10; oz., .75

SPINACH

German,—Spinat

French,—Epinard

Spanish,—Espinaca

One ounce for 100 feet of drill; 10 to 12 pounds in drills for an acre

J.B.R.S.Co.

Spinach

SPINACH (Continued)

This is a very important crop in our market gardens, and is one of the most easily managed of all vegetables, requiring but little culture, and may be had fit for use the entire season. The main crop is sown in September. It is sometimes covered up in exposed places with straw or salt hay during winter, which prevents it from being cut with frost; but in sheltered fields there is no necessity for covering. For summer use it may be sown at intervals of two or three weeks from April to August. Spinach is best developed and most tender when grown in rich soil.

King of Denmark. A fine long season variety remaining longer than most varieties before going to

seed; leaves large, crumpled and blistered. Deep green color. Pkt., .10; oz., .15; ¼ lb., .25; lb., .75

Long Standing Thick Leaved. Stands longest before running to seed; dark green.

Pkt., .10; oz., .15; ¼ lb., .25; lb., .75

Giant Thick Leaf. This variety gives the best results. The leaves are large, thick and somewhat crumpled, and it is equally good for spring or autumn sowing.

Pkt., .10; oz., .15; ¼ lb., .25; lb., .75

New Zealand. A valuable variety for the garden as it produces the thick, tender leaves throughout the summer. Grows very large and luxuriantly in warm, rich soil.

Pkt., .10; oz., .20; ¼ lb., .50; lb., \$1.75

RADISH

German,—Rettig, Rabies Spanish,—Rabano
French,—Radis, Rave, Petite Rave

One ounce will sow 100 feet of drill

Culture. The soil for Radishes should be very rich, light and mellow, well broken by digging, as their tender and mild qualities depend very much upon their rapid growth. For very early use sow in hotbeds in February and March and in the open air as soon as the ground can be worked, at intervals of ten or twelve days for a succession as long as they may be wanted. The winter varieties should be sown in August, lifted before severe frost, and stored in the cellar.

Vick's Scarlet Globe Radish. A leader among bright round Red Radishes. Quick maturing, extremely attractive, short tops, solid and fine flavor.

Pkt., .10; oz., .20; ¼ lb., .50; lb., \$1.50

Long White Vienna. Of rapid growth and beautiful shape; skin and flesh snow-white. The finest of long white radishes.

Pkt., .10; oz., .20; ¼ lb., .50; lb., \$1.50

China Rose. Bright rose-colored skin; flesh white and quality excellent; one of the best for fall and winter use.

Pkt., .10; oz., .20; ¼ lb., .50; lb., \$1.50

Early Scarlet Turnip. A well known and popular variety. Small top of quick growth, mild and crisp.

Pkt., .10; oz., .20; ¼ lb., .50; lb., \$1.50

Early Scarlet Turnip, White Tipped. One of the handsomest of the turnip radishes and a great favorite in many large markets for early planting outdoors. Roots slightly flattened on the under side; color, very deep scarlet with a white tip; flesh white and of the best quality.

Pkt., .10; oz., .20; ¼ lb., .50; lb., \$1.50

Vick's Scarlet Globe Radish

French Breakfast. Olive-shaped scarlet, with white tip; crisp and tender. Very early. A general favorite.

Pkt., .10; oz., .20; ¼ lb., .50; lb., \$1.50

Crimson Giant Forcing. Best of forcing sorts. Grown larger than other turnip shaped varieties and fine eating.

Pkt., .10; oz., .20; ¼ lb., .50; lb., \$1.50

For the Lawn, PURITY LAWN SEED IS BEST

RADISHES (Continued)

Long Scarlet. Short top. The standard variety of the long sorts, used either for forcing or open culture; six or seven inches long.

Pkt., .10; oz., .20; $\frac{1}{4}$ lb., .50; lb., \$1.50

Long Black Spanish. Long black, flesh white and slightly pungent; one of the latest and hardest.

Pkt., .10; oz., .20; $\frac{1}{4}$ lb., .50; lb., \$1.50

Round Black Spanish. Skin black, white fleshed and piquant flavor.

Pkt., .10; oz., .20; $\frac{1}{4}$ lb., .50; lb., \$1.50

SALSIFY or Oyster Plant

German,—Bocksbart

French,—Salsifis

Spanish,—Ostra Vegetal

One ounce will sow 50 feet of drill

Culture. Sow the seed in light, deep soil, early in the spring, in drills twelve inches apart and one inch deep, thinning out the young plants to four or five inches. The roots will be ready for use in October, when a supply should be taken up and stored, like carrots. Those remaining till spring should be dug up before commencing their growth.

Mammoth Sandwich Island. We consider this the largest and most profitable salsify in cultivation. It is pure white in color and invaluable to market gardeners.

Pkt., .10; oz., .25; $\frac{1}{4}$ lb., .75

TOMATO

German,—Liebsapfel

Spanish,—Tomate

In this latitude to produce extra early tomatoes the seeds should be planted in the hotbed about the middle of February, in drills five inches apart, and not over one-half inch deep.

For ordinary plants, sow the seed early in March.

When the plants are two inches high they should be transplanted three to four inches apart. The final transplanting to the open ground may be made the last of May, when the plants should be fine, large and stocky, and if sufficient soil is taken up with each plant, they will keep right on growing with no setback.

Red Head. An early variety, bright red in color, round and smooth, uniform in size and with an excellent flavor.

Pkt., .10; oz., .40

Earliana. It is remarkable for its earliness, very large size, handsome shape and bright red color. Its solidity and fine qualities are equal to the best medium and late sorts.

Pkt., .10; oz., .40; $\frac{1}{4}$ lb., \$1.25

Chalk's Early Jewel. This is a very productive variety. Ripens nearly as early as Spark's Earliana, but is more desirable for home use as the fruits are thicker through and more solid; borne in large clusters. Color bright scarlet and quality good.

Pkt., .10; oz., .40; $\frac{1}{4}$ lb., \$1.25

Red Head

Dwarf Champion. Dwarf and strong habit of growth; very solid and of extra quality.

Pkt., .10; oz., .40; $\frac{1}{4}$ lb., \$1.25

Ponderosa. Very large, solid and of a good flavor. Specimens have been grown to weigh four pounds. Bright red. Very few seeds.

Pkt., .10; oz., .40; $\frac{1}{4}$ lb., \$1.25

Stone. Fruit very large and deep; bright scarlet, smooth, ripening evenly to the stem without a crack; exceedingly solid and firm-fleshed, of the finest quality; one of the best for family use and for canneries. Late.

Pkt., .10; oz., .40; $\frac{1}{4}$ lb., \$1.25

June Pink. An early variety, similar in habit to the famous Earliana, differing only in its color, which is pink instead of red. Early, blight resisting, long and heavy yielding. An excellent shipper on account of its reasonably tough skin.

Pkt., .10; oz., .40; $\frac{1}{4}$ lb., \$1.25

John Baer. An extra early variety. Brilliant red. Almost seedless and sweet flavor. Uniform in size and ripening.

Pkt., .10; oz., .40; $\frac{1}{4}$ lb., \$1.25

Marglobe. The best of the blight-resisting varieties. Will withstand a long period of unfavorable weather. Fruit large, solid, and bright scarlet in color.

Pkt., .10; oz., .40; $\frac{1}{4}$ lb., \$1.25

SQUASH

German,—Kurbiss

French,—Cource

Spanish,—Calabaza

One ounce Early will plant 50 hills; one ounce Marrow, 25 hills

Culture. The plants are very tender and sensitive to cold, and planting must be delayed until settled warm weather. The general principles of culture are the same as those given for cucumbers and melons, but the plants are less particular as to soil. The summer varieties should be planted four feet apart each way, and the winter sorts eight feet. Three plants are sufficient for a hill. Care should be taken not to break the stems from the squashes intended for winter use, as the slightest injury will increase the liability to decay.

Improved Hubbard. The well-known and standard late variety; our strain is excellent.

Pkt., .10; oz., .15; ¼ lb., .50; lb., \$1.50

Golden Hubbard. A genuine Hubbard Squash except in color, which is a bright red; quality excellent.

Pkt., .10; oz., .15; ¼ lb., .50; lb., \$1.50

Warted Hubbard. A superior strain of mammoth size, and entirely covered with warty excrescences. Rich, dark-green color, and of very best quality.

Pkt., .10; oz., .15; ¼ lb., .50; lb., \$1.50

Blue Hubbard. A new type of Hubbard Squash said to excel all others in quality. Growth and habit same as Hubbard, but with a bluish-gray color.

Pkt., .10; oz., .15; ¼ lb., .50; lb., \$1.50

Giant Summer Crookneck. Double the size of an ordinary Crookneck and very warty, but similar in other respects. Their handsome appearance commands an extra price in the market.

Pkt., .10; oz., .15; ¼ lb., .50; lb., \$1.50

Delicious. We have found in this squash all that the originator claims for it. It is the driest, sweetest and finest flavored squash we have ever tasted. A fall and winter squash and is a good keeper.

Pkt., .10; oz., .15; ¼ lb., .50; lb., \$1.50

Boston Marrow. Fine fall variety; oval, bright orange; flesh yellow and firm; best for pies, and also for canning. Pkt., .10; oz., .15; ¼ lb., .50; lb., \$1.50

Early White Bush Scalloped. A standard summer variety; good either for home or market garden.

Pkt., .10; oz., .15; ¼ lb., .50; lb., \$1.50

TOBACCO

Connecticut Seed Leaf. Best adapted for the climate of the Northern and Middle States.

Pkt., .10; oz., .30

TURNIP

German,—Steckrube

French,—Navet

Spanish,—Nabo Comun

Turnips may be sown at all seasons from April to August in our climate, although those will be the best which are sown very early in spring for summer crops, and early in August for a fall and winter crop. A light soil, well manured the previous year, is the best. A few hundred pounds per acre of quick-acting fertilizer will have a tendency to make the roots smooth, and to make the rapid growth so essential in producing sweet and palatable turnips.

TURNIPS (Continued)

Extra Early Purple Top Milan (Flat). The earliest turnip in cultivation and a splendid variety; favorite with gardeners who want first turnips in market. Bulb white, flat, of medium size, with a bright purple top; one of the sweetest and finest flavored of summer sorts.

Pkt., .10; oz., .20; ¼ lb., .60; lb., \$2.00

Extra Early White Milan. This is one of our most popular turnips for spring sowing. It is a splendid extra early turnip in which the extreme earliness, small top and tap-root of the Purple Top Milan is united with clear white skin and flesh.

Pkt., .10; oz., .20; ¼ lb., .60; lb., \$2.00

Purple Top Strap Leaf. Rapid grower and mild flavor. The most popular variety for early use, either for the table or stock.

Pkt., .10; oz., .15; ¼ lb., .40; lb., \$1.00

Yellow Stone. A very popular yellow-fleshed variety, fine for table use. Flesh very firm, tender, sweet and fine flavored; an excellent keeper.

Pkt., .10; oz., .15; ¼ lb., .40; lb., \$1.00

White Egg. Belongs to the class of quick-growing fall turnips, and for this purpose should be sown in this latitude between August 1 and 10. Its shape is nearly oval or egg, as its name would indicate.

Pkt., .10; oz., .15; ¼ lb., .40; lb., \$1.00

Ruta Baga or Swedish Turnip

Ruta Bagas, or Swedes, should be planted from the last of June to about July 10, as they require more time in which to mature than the Early or Strap Leaf varieties. Newly-turned soil will produce the sweetest and smoothest turnips.

Long Island Purple. Undoubtedly the finest variety of purple-top Ruta Baga. Leaves few and small; bulbs fine shaped with very short, small necks; purple crown, skin and flesh bright yellow, solid, sweet and mild flavor. Pkt., .10; oz., .15; ¼ lb., .40; lb., \$1.25

White Sweet German. Sweet, and fine flavor. Good keeper. Pkt., .10; oz., .15; ¼ lb., .40; lb., \$1.25

Skirving's Purple Top. Well-known, yellow fleshed variety of large size and fine quality; for stock or table.

Pkt., .10; oz., .15; ¼ lb., .40; lb., \$1.25

Imperial Hardy Swede. Claimed by many to be the best Swede turnip grown. Bulb of large size with purple crown; flesh yellow; very smooth and heavy cropper. Pkt., .10; oz., .15; ¼ lb., .40; lb., \$1.25

Vegetable and Flower Plants

We have in their season a choice assortment of both vegetable and flower plants.

Tomato Plants. Dwarf Champion, Chalk's Jewel, Earliana, etc.

Cabbage Plants. All Seasons, Stone Mason, Drum-head, Danish Ball Head, Early Summer, etc.

Cauliflower. Snowball.

Celery. Giant Pascal, Golden Self-Blanching, White Plume.

Flower Plants. Pansies, Verbenas, Stocks, Salvia, Asters, Zinnias, Phlox.

Our Plants are all grown for us locally and are hardy and vigorous. Prices as low as can be made and furnish good, strong, healthy plants.

Bird Seed

Add 8c per lb., each additional lb. add .01 for postage. Prices subject to variations of the Market.

Canary. Sicily, selected	Sunflower. Russian
Hemp. Russian, first quality	Millet
Rape.	Cuttle Fish Unhulled Rice

GRASSES AND GRAINS

NOTE—Owing to the frequent changes in price of Grains and Grasses we have refrained from inserting prices of them in this catalogue. The lowest market prices will be quoted on application.

Special Attention

While we carry several grades of the different varieties of seeds, we recommend our Purity Brand as the very best the market affords. These seeds are strictly Northern grown, and are selected by us because they possess the two essential qualities of purity and vitality. It is well known that there have been large quantities of Grass and Clover Seed sold as pure, which official analysis has shown to contain large percentages of adulteration. This not only defrauds the planter by selling him a worse than useless article, but inflicts injury also by filling his land with noxious weeds. We list Grass and Clover Seed according to their quality, grading down from our Purity Brand, which is always the best.

Timothy, Clovers, Millets, Red Top
in several grades

Purity Brand Lawn Seed
Our own mixture, from the purest seeds obtainable.
We can surely please you on this brand.

INSECTICIDES and FUNGICIDES

SPRAY CALENDAR AND GUIDE

Pest	What to Use	Dilution, lbs.	1st Spraying	2d Spraying	Successive Spraying
Codling Moth	Dry Arsenate Lead Dry Arsenate Calcium	*1 to 1½ ¾	Immediately after blossoms fall	2 weeks later	Consult your Exper. Sta.
Canker Worm	Dry Arsenate Lead Dry Arsenate Calcium	*1 to 1½ ¾	When young first appear	4-6 days later	" "
Tent Caterpillar	Dry Arsenate Lead Dry Arsenate Calcium	*1 to 1½ ¾	As insects appear	As needed	" "
Leaf Crumpler	Dry Arsenate Lead Dry Arsenate Calcium	*1 to 1½ ¾	About middle of May	As needed	" "
Slug	Dry Arsenate Lead Dry Arsenate Calcium	*1 to 1½ ¾	When insects appear	Repeat 10 da. 2 wks. if necessary	" "
Plum Gouger	Dry Arsenate Lead	*¾ to 1	Before leaves and buds open		
Strawberry Crown Borer	Dry Arsenate Lead Dry Arsenate Calcium	*1 to 1½ ½	Late summer		" "
Strawberry Leaf Roller	Dry Arsenate Lead Dry Arsenate Calcium	*1 to 1½ ½	In August		" "
Strawberry Slug	Dry Arsenate Lead	*1 to 1½	In May when insects appear		" "
Strawberry Root Worm	Dry Arsenate Calcium	½			" "
Imported Currant Worm	Dry Arsenate Lead Dry Arsenate Calcium	*1 to 1½ ½	As soon as insects appear		" "
Gooseberry Fruit Worm	Dry Arsenate Lead Dry Arsenate Calcium	*1 to 1½ ½	As soon as insects appear		" "
Raspberry Slug	Dry Arsenate Lead Dry Arsenate Calcium	*1 to 1½ ½	Early in spring		" "
Raspberry Byturus	Dry Arsenate Lead Dry Arsenate Calcium	*1 to 1½ ½	1st of May		" "
Potato Beetle	Dry Arsenate Lead Dry Arsenate Calcium	*2 to 4 1½ to 2	When insects appear		Repeat as often as necessary

*To 50 gallons of water.

The above recommendations are condensed and are somewhat subject to change depending upon conditions in various sections of the country.

Where an effective combination Insecticide and Fungicide is desired, "Bordo-Arsenate" used at same strength as indicated for Dry Powdered Arsenate of Lead will give splendid results. Dry Powdered Bordeaux Mixture can be used as a dry dust just as it comes from the package or in combination with equal quantities of Dry Powdered Arsenate of Lead or Arsenate of Calcium. When using Dry Powdered Bordeaux Mixture as a wet spray use from three to five pounds to fifty gallons of water for the control of most fungus diseases.

Dry Powdered Insecticides can be used for dry dusting just as they come from the package.

For the convenience of the home gardener, the above table will be of interest.

Dry Powdered Arsenate of Lead where used at strength of one pound to fifty gallons of water, should be used at rate of two to three teaspoonfuls to one gallon of water.

Dry Powdered Arsenate of Calcium where used at rate of three-fourths pound to fifty gallons of water, should be used at rate of two to three teaspoonfuls to one gallon of water.

Dry Powdered Bordeaux Mixture when used at rate of three pounds to fifty gallons of water, should be used at the rate of from nine to twelve teaspoonfuls to one gallon of water.

Dry Powdered Bordo-Arsenate when used at rate of one pound to fifty gallons of water should be used at rate of three to four teaspoonfuls to one gallon of water.

ADVISED DUSTING SCHEDULE FOR APPLES

Time	Material	To Control
1. Late Winter Dormant and Delayed Dormant Stage	Emulso or Soluble Sulphur Compound	Scale, Red Mite and Early Scab
2. Pre-pink Stage After delayed dormant when blossom buds are exposed, but not separated	Kolodust	Apple Scab
3. Pink Stage Just as buds show pink and clusters are starting	Kolotex	Apple Scab, Bud Moth, Case Bearer and certain other chewing insects
3-A During seasons when a period of over five days elapses between pink and calyx Kolodust should be applied again for the prevention of Apple Scab infection. Kolodust contains no poison—will not injure bees.		
4. Calyx; just after petals fall	Kolokil (heavy poison content)	Apple Scab, Codling Moth, Caterpillars and certain other chewing insects
5. Five to ten days after petals fall	Kolokil or Kolotex	Curculio, Codling Moth, lesser apple worms and green fruit worms.
6. About July 5 to 15	Kolokil or Kolotex	Apple Maggot or Railroad Worm.

(A) The above dusting schedule is merely a guide. Local or seasonal conditions may necessitate changes in time of application. The apple maggot or Railroad worm is best controlled by dusting according to the emergence of the flies. This period is usually the first or second week in July. For control of this insect application should be repeated in 14 days.

(B) In seasons when rains are frequent before petal fall, apple scab is more difficult to control. On such varieties as McIntosh Reds, R. I. Greenings and other susceptible varieties frequent applications should be made in order to keep all new growth covered against infection.

(C) Orchards should be kept under continued observation after applications for the control of Apple Maggot (as indicated in the schedule) have been made. Weather conditions may be conducive to the development of apple scab or sooty blotch and under such conditions further applications of Kolodust will be necessary. Late Codling Moth may become serious in which case it will be necessary to make further applications of Kolokil or Kolotex.

(D) Dust with A-1 Mixture when Aphis becomes serious.

INSECTICIDES and FUNGICIDES

NIAGARA DUSTING MATERIAL.

STANDARD MIXTURES.

Name	Principal Ingredients	General Use
Super Sulfodust	Dusting Sulphur with special spreader and sticker—300 mesh or finer.	Standard Sulphur Fungicide without poison for Apple Scab, Brown Rot, etc.
Kolodust (Patented)	Fused Sulphur Dust containing colloidal sulphur. A dust you can see stick.	The new exclusive Niagara Fungicide without poison for Apple Scab, Brown Rot, etc.
Kolotex (Patented)	Kolodust and Lead Arsenate.	The new exclusive Niagara Sulphur Fungicide with Lead Arsenate for chewing insects and diseases of apples, pears; Coddling Moth, Strawberry Weevil.
Kolokil (Patented)	Kolodust with greater poison content than Kolotex.	The new exclusive Niagara Sulphur Fungicide with heavy Lead Arsenate content, for chewing insects and diseases of apples, pears, etc.
D-25	Copper Lime Dust containing Monohydrated Copper Sulphate.	High content Copper Lime Dust for control of plant diseases such as potato blight where severe blight conditions prevail.
D-18	Monohydrated Copper Sulphate and Calcium Arsenate (poison)	Standard copper fungicide with poison for control of potato bugs and blight.
A-1 Mixture	Nicotine Dust containing guaranteed analysis 2.7% actual nicotine.	For Aphids, Red Bug, Pear Psylla, etc. The standard contact dust for sucking insects.
Koloform	An effective non-caustic summer fungicide containing colloidal sulphur used for spraying in place of caustic spray material. Will not burn or russet fruit.	Koloform is a non-caustic Summer spray material containing colloidal sulphur used for the control of such diseases as Apple Scab and Brown Rot of stone fruits.
Emulso (Oil Spray)	Perfectly emulsified and stable oil emulsion for use with hard or soft water. Can be used in combination sprays with Dry Lime Sulphur, Bordo Mixture, Lime Sulphur Solution, Soluble Sulphur Compound when necessary to provide a fungicide.	

Arsenate of Lead Powder

Arsenate of Lead Powder kills most leaf-eating insects like Potato Bugs, Canker Worms, Elm Leaf Beetle, Gypsy and Brown Tail Moths, Potato Beetle and similar insects that feed on the foliage.

Bordeaux Mixture Powder

Bordeaux Mixture Powder can be used wherever paste Bordeaux Mixture has been used heretofore. It is splendidly adapted for both fruit trees and truck crop work, and can be used in combination with any insecticide, either as a dry or a liquid spray.

Bordo-Arsenate Powder—The Two-in-One Spray

This product combines the killing properties of Arsenate of Lead and the fungus preventative qualities of Bordeaux Mixture.

Dry Powdered Bordo-Arsenate being a scientific combination of Arsenate of Lead and Bordeaux Mixture will control both external leaf-eating insects and fungus diseases at the same time. It is prepared in dry powdered form which is a decided advantage over the old form of paste products.

Lime-Sulphur Powder

Lime-Sulphur Powder is an improved standard spray material. Safe and effective, not only as a dormant spray, but also as a summer spray in combination with Arsenate of Lead. Tested by experiment stations and found superior to all dry compounds on the market, in safety and effectiveness. It will control San Jose Scale and many other scale insects. It is effective against Leaf Blister Mite, Peach Leaf Curl, Apple Scab and Brown Rot of cherries and plums.

Arsenate of Calcium Powder

The use of Arsenate of Calcium Powder as a stomach poison for controlling leaf-eating insects has become more general each year.

Paris Green

Paris Green is the oldest and most widely-used spray poison on the market. As a spray on potatoes against "bugs" it has no peer.

Paris Green kills quickly on account of its high arsenic content and will not burn the foliage of potatoes because of its low percentage of water soluble arsenic.

Carbola

Carbola is a white paint in powder form combined with a disinfectant twenty times stronger than carbolic acid. It is ready to use as soon as mixed with water — no waiting or straining. it can be applied with a brush or spray pump to wood, brick, stone, cement, plaster-board, etc., or over whitewash.

It paints and disinfects at one operation, and is recommended for use

Instead of Whitewash and as a Disinfectant Used in

Sulphur Candles

The Crater Sulphur Candle Fumigator. ½ lb. size, .15, postpaid, .25; 1 dozen, \$1.25, postpaid, \$1.50.

P. A. C. Formaldehyde

Prevents and Eradicates Stinking Smut of Wheat

For Oat, Wheat and Rye Smut (except loose smut of wheat and barley which this preparation will not control) spread the seed on the floor, sprinkle with P. A. C. Formaldehyde, 1 pound (1 pint) to 36 gallons of water, and shovel over to mix thoroughly, after which spread out and dry.

For Potato Scab, and to destroy other germs on seed potatoes, soak two hours in P. A. C. Formaldehyde, 1 pound to 15 gallons of water. Price, 1 lb. tins, .35.

Dr. Hess Dip and Disinfectant

Means Better Health Conditions
For Your Farm Stock

It kills body parasites. It destroys disease germs. It keeps down foul odors. It makes healthful living quarters. It keeps the skin clean and healthy. Stock health is the basis of stock thrift.

For Household Use

For the Sick-room. Make a solution of Dr. Hess Dip and Disinfectant, 1 tablespoonful to a quart of soft, lukewarm water. Place in an open vessel in the sick-room and renew every other day.

Price: 1 qt., .65, postpaid, .75; 2 qts., \$1.00, postpaid, \$1.15. 1 gallon, \$1.75.

COOPER'S SHEEP DIPPING POWDER The Original Powder Dip

One package makes twenty-five gallons of dip.
Price, .65; postpaid, .77

Tree Tanglefoot

For protecting trees against climbing insect pests in a simple, economical and effective way, use Tree Tanglefoot—a sticky substance applied directly to the bark of trees. One application remains sticky on the trees three months, fully exposed to the weather. Easily applied with a small wooden paddle. One pound will make a band 7 to 8 feet long.
Price: 1 lb. can, .60, postpaid, .73; 5 lb. can, \$2.50, postpaid, \$2.70.

HASKELL IMPLEMENT AND SEED CO. LEWISTON MAINE

Creonoid

Barrett's Creonoid is an up-to-date preparation from coal tar of invaluable service to the poultrymen, stock raisers and farmers. It eliminates flies and mosquitoes, and insures sanitary conditions in stables, stock sheds, around barnyards, etc.

Price, gallon cans, \$1.25

CROW CORN OIL

Protects newly planted corn from crows. Mix one part Anti-Crow Corn Oil with two parts hot water.

Price, .35; postpaid, .45

Crow Repellent

Stanley's Prevents crows, other birds, and animal pests from pulling corn. Protects corn from rot caused by moisture. Does not clog planter.

Price: Half Pint, \$.60, postpaid, \$.70; Pint, \$1.00, postpaid, \$1.10.

Powdered Hellebore

For use against leaf-eating insects such as rose slugs, currant worms, cabbage worms and many other leaf-eating insects where mild poison is required, as Powdered White Hellebore. Not mailable.

Price, ½ lb., .25

Sulphate of Copper—Blue Vitriol

For making Bordeaux Mixture with Hydrated Lime. Market prices.

Oriole Brand Pine Tar

1 Pint, .25, postpaid, .35; 1 quart, .35, postpaid, .50.

Oriole Brand Coal Tar

1 pint, .20, postpaid, .30; 1 quart, .30, postpaid, .45.

Insect Powder and Bellows Combined

Red Wing is the best Insect Powder that can be procured and once you try it you will use no other. For the destruction of Roaches, Bed-Bugs, Fleas, Moths, Ants, Flies, etc.

Prices: Small, .10, Parcel Post, .05. Large, .25, Parcel Post, .06.

FLIT

A scientific household insecticide.

Flit kills flies, mosquitoes, moths, ants, bed-bugs, roaches, many other household insects, their eggs and larvae. Flit is a 100% effective insecticide, containing no inactive ingredients. In exhaustive tests Flit

spray did not stain the most delicate fabrics.

Prices: 1 Half pint can, .35; postpaid, .45; 1 pint can, .60; postpaid, .72; 1 quart can, \$1.00; postpaid, \$1.15; gallon can, \$3.25. Flit hand sprayer, .25; postpaid, 35.

VOLCK

Volck is one of the most powerful insecticides known. It is effective on practically all insects on ornamental and flowering plants. Wonderful results have been obtained against red spiders, cyclamen mite, aphids (green fly), scale, mealy bugs, thrips, and caterpillars. Many pests that could not be controlled before are now killed with Volck. Even mildews and rusts are prevented and stopped by Volck. Not only does

Volck give effective control of pests, but it also prevents reinfestation for a considerable period. Volck is odorless, colorless and non-poisonous. There is no unsightly residue. Plants are deep glistening green after using Volck.

Prices: ½ pt. cans, .50, postpaid, .60; 1 pt. cans, .75, postpaid, .87; 1 qt. cans, \$1.00, postpaid, \$1.15; 1 gal. cans, \$3.00, postpaid, \$3.20.

Evergreen

Kills cutworms. Non-poisonous. Will not burn or injure the tenderest crop. Does not injure the soil in any way. Will not gum sprayers. Pleasant and easy to use. No unpleasant odor. When undiluted Evergreen retains its strength indefinitely.

To kill Cutworms, use one part of Evergreen to 100 parts of water. Spray around plants, wetting ground thoroughly. Cutworms coming in contact with the solution will come to the surface and die. Keep ground around plants moist. Do not use soap.

Prices: 1 ounce bottle, .35, postpaid, .45; 6 ounce bottle, \$1.00, postpaid, \$1.10; 16 ounce bottle, \$2.00, postpaid, \$2.15.

All Prices Subject to Change Without Notice

BUG DEATH

Bug Death is a fine, tenacious powder, scientifically compounded and finely ground. It may be applied in water or DRY, just as it comes in package. We recommend DRY application; no drawing water, no mixing solutions. The best time for dusting is early morning when plants are wet with dew, which makes the powder "stick like all possessed."

Prices: 10 oz., Sifter Top Carton, .25, postpaid, .35; 12½ lb. box, \$1.65, postpaid, \$1.85; 100 lb. Bag, \$10.25.

Red Arrow Insect Spray

For Controlling Root Bulb and Soil Insects

- | | |
|-----------------|----------------|

RED ARROW EFFECTIVE

Red Arrow is a contact insecticide. Red Arrow kills by progressive paralysis. Death is not immediate but absolutely sure. Insects properly sprayed never recover. Fatal to both chewing and sucking insects.

Prices: 1-oz. bottle, .35; postpaid, .45; Half Pint can, \$1.75; postpaid, \$1.90.

Gator-Hide Mulch Paper

Gator-Hide stimulates and hastens plant growth and produces bigger, sturdier, earlier crops or blooms. And remember, there is absolutely no weeding or cultivating in the soil that is covered by the paper.

It's so simple—this better way of growing garden things—so much easier that there's small wonder that in place of the thousands who tried it last year, there will be hundreds of thousands planting with Gator-Hide this season.

Try Gator-Hide Mulch Paper this year—Full instructions furnished with every roll.

BETTER MILK

BETTER DAIRY and FOOD PRODUCTS
by using

B - K

STERILIZER — CLEANSER — DEODORANT
POWERFUL — SAFE — CLEAN — NON-POISONOUS — COLORLESS

Note These Remarkable Qualities of B-K

Powerful. By U. S. Hyg. Lab. Method of Test B-K has coefficient 10—i. e.—10 times greater germ killing strength than undiluted carbolic acid.

Safe. B-K contains no poison, acid, oil, or anything harmful to food products. Sterilizes utensils—is not a preservative.

Cleanser and solvent of casein and bacteria.

Deodorant. It destroys all odors and their cause—leaves no odor of itself—helps to keep the dairy and the products clean and sweet.

Clean. B-K is clear, and clean as water.

Cheap to Use. B-K is so powerful that very little makes many gallons of sterilizing solution.

Put up in single gallon and single 5-gallon packages each separately boxed.

For Highest Sanitation in

COSTS YOU NOW ONLY

Nine cents per Billion Legume Germs as packed in 1 bushel sizes for Alfalfa and Clover.

8¢ per Billion for Soy Beans, Cow Peas, Lespedeza, and only 6¢ per Billion for Peas, Beans and Vetch—even lower rates on all large sizes.

IF IT'S PRICE ALONE—THEN USE 1 BUSHEL SIZE FOR 2 BUSHEL SEED

Although not recommended for best results ANY 1 bushel size NITRAGIN can be used for 2 bushel seed, and give good inoculation.

THE TRUTH ABOUT INOCULATORS

When you buy inoculation ALL you buy is Legume Germs. You cannot see them with the naked eye. All you see in the container is the material where these Germs live.

These Germs are PERISHABLE, whether packed in tins or in bottles inoculants over a year old may have little or no value.

The NUMBER of fresh, selected Legume Germs in a package is the most important thing to look out for—not the price or the size of the package.

NITRAGIN INOCULATION PRICES

Alfalfa, All Clover, 1/2 bu., .50, postpaid, .55; 1 bu., .90, postpaid, \$1.00; Peas, Vetch, Beans, 1/2 bu., .40, postpaid, .45; 1 bu., .60, postpaid, .65; Soy Beans, Cow Peas, 1 bu., .40, postpaid, .45; 2 bu., .70, postpaid, .75; Peas, Beans, Sweet Peas—garden size, .25, postpaid, .30.

Black Leaf 40
40% Nicotine

Kills Aphids

It Works While They Roost

A concentrated solution of Nicotine Sulphate. Active ingredients Nicotine 40%. For spraying fruit trees to destroy soft-bodied sucking insects. Each sucking insect must be "hit" by spray to be affected.

'PAINT' THE ROOSTS

WITH "BLACK LEAF 40"

When chickens perch upon roosts that have been "painted" with "Black Leaf 40," fumes are slowly released and penetrate the feathers, killing the body-lice; no interference with egg production nor any discomfort to the birds. It is for these several reasons that poultry experts have welcomed the "Black Leaf 40" treatment so enthusiastically.

Packing and Prices

2-lb. tin (Treats 385 to 480 running ft. of roost) \$3.35
5-oz. bottle (Treats 90-120 running ft. of roost) \$1.00
1-oz. bottle (Treats 12 to 15 running ft. of roost) .35

STIM-U-PLANT

An All-the-Year Fertilizer for Garden and House Plants

Growers of fine flowers, shrubs and vegetables for the best markets and for exhibition, fertilize and stimulate them frequently, a little at a time. An excellent fertilizer for this purpose is Stim-U-plant, an odorless, highly concentrated plant-food, in tablet form, with guaranteed chemical analysis of 11 per cent. nitrogen, 12 per cent. phosphoric acid, 15 per cent. potash. The proportions are accurate.

Stim-U-plant Tablets

can be used in tablet form, or dissolved in water at the rate of one tablet to the quart. Complete directions with every package.

Order Stim-U-plant tablets with your seed and plant order. Price, 10 tablets for 15 cts., postpaid, .20; 30 for 25 cts., postpaid, .30; 100 for 75 cts., postpaid, .80; 1,000 for \$3.50, postpaid, 3.75.

CARBOLINEUM

The following are inside the poultry house uses of the original and genuine Carbolineum which are worth your serious consideration:

Point 1. Prevents moisture, filth and dirt from working down into wood or concrete floors and makes cleaning floors easier.

Point 2. Disinfects deep cracks and crevices, where vermin and disease germs propagate.

Point 3. Prevents gnawing of wood by rats or mice.

Point 4. Kills and stops the propagation of chicken mites or fowl ticks in poultry houses for a whole year or purchase money refunded.

Point 5. Accomplishes the principal object of painting—wood preservation—with lasting color effect. The bungalow brown color it stains wood makes it very suitable for painting exterior of poultry houses, shingles, posts or fences, and if trimmings are painted white, blends well with the surroundings anywhere.

Sold under Money Back Guarantee.

Prices: 1 gal. can, \$1.75; 5 gal. can, \$7.25.

SEED DISINFECTANTS

Control Seed-borne Diseases of Farm Crops
Stimulate Germination – Improve Stands
Generally Produce Increased Yields of Higher Quality

CERESAN

for seed treatment of small grains

PRICES	
1 lb.	\$.75
5 lbs.	3.00
25 lbs.	12.50
100 lbs.	49.00
300 lbs.	144.00

Ceresan has proven effective in controlling such seed-borne diseases as bunt or stinking smut of wheat; stripe disease of barley; loose and covered smuts of barley and oats and covered kernel smut of sorghum. It is the only dust treatment which has successfully controlled these destructive grain diseases. Ceresan does not injure the seed nor the grain drill. Only 2 oz. of Ceresan required per bushel of wheat, rye or sorghum and 3 oz. for barley and oats. Easy to apply, economical to use.

SEMESAN BEL

for seed white and sweet potatoes

PRICES	
4 oz.	\$.50
1 lb.	1.75
5 lbs.	8.00
25 lbs.	31.25
100 lbs.	120.00
300 lbs.	345.00

Simply mix, dip, drain, dry and your seed potatoes are ready for planting. Semesan Bel may be used on either whole or cut seed pieces. Semesan Bel effectively controls such seed-borne disease organisms as scab, rhizoctonia and black-leg. By controlling these diseases, germination is generally increased, stand improved and the resultant crop bigger and of better quality. One pound treats 16 to 20 bushels of seed. Du Bay Semesan succeeds the products sold as Du Pont Semesan Bel and Bayer Dipdust.

SEMESAN JR.

for seed field and sweet corn

Semesan Jr. is especially effective in controlling seed-borne infections of diplodia, Gibberella and Basisporium, without harming the seed embryo in the least. Its use protects the seed from rotting in the ground and makes possible earlier planting which generally results in increased yields. Improved germination, better stands, control of certain diseases, increased yields are the benefits which thousands of farmers are reaping, at a cost of less than 3c. an acre. Succeeds the products sold as Du Pont Semesan Jr. and Bayer Dust.

PRICES	
4 oz.	\$.40
1 lb.	1.50
5 lb.	7.00
25 lbs.	23.75

PRICES	
2 oz.	\$.50
8 oz.	1.60
1 lb.	2.50
5 lb.	11.75

SEMESAN

for flower and vegetable seeds

Semesan may be applied in dust or liquid form to the seed before planting. It is harmless to the seed but deadly to disease organisms that may be on the seed. Semesan is such a powerful and effective disinfectant that seed treatment with it is ridiculously low in cost, ranging from 1/4c. to 1c. per pound of seed. One ounce treats 15 lbs. of seed. Effective in controlling damping off and such devastating gladiolus diseases as hard rot and scab. Du Bay Semesan succeeds the products sold as Du Pont Semesan and Bayer Uspulun.

Du Bay Seed Disinfectants, like many agricultural chemicals, are poisonous in nature and owing to present Postal Regulations cannot be sent through the mails but must be sent by express or freight.

Treat All Seeds Before Planting with Du Bay Disinfectants

For Beautiful Lawns and Gardens

All plants require a complete, balanced diet for full growth and beauty. The best seeds or plants will not produce good results if grown in a soil which is deficient in any one of the many necessary food elements.

For velvety-green lawns with deep, extensive roots; large, beautiful flowers; luxuriantly foliaged shrubs and trees; and early, delicious vegetables, feed them Vigoro, the complete, scientifically balanced food for all plants, and you may be sure your plants have all the nourishment they need.

Vigoro is easy to use and economical. Simple directions for feeding everything you grow accompany each bag or package. Vigoro is used annually on 3,000,000 homes. We recommend it.

You Need One! For best results Vigoro and grass seed must be applied evenly. You can do this better with a Vigoro Spreader. The Little model was especially designed for use of the small homeowner on established lawns. It has a 14-inch spread and a hopper capacity of about 13 pounds.

Standard Vigoro Spreader

Larger models, adjustable to various rates of application and equipped with a handle controlled shut-off, may be had at reasonable prices. Write for description.

F.O.B. Lewiston, Me.

Queen Incubators

Queen Standard

A Queen costs but little more, and the extra chicks that live and grow soon pay the difference.

Remember, it is not how many chicks you HATCH that counts, but how many you RAISE. Chicks that hatch out weak and wobbly,

and live but a few days, mean nothing to you but trouble and loss. They make one sick of the poultry business.

Most of the chicks you lose in the first few weeks die because they did not have, when hatched, enough strength or vitality for a good start.

Write for Prices.

Jamesway Coal Moistened Warm Air Brooder

Don't take chances with your chicks. The brooder you use largely determines the kind of chicks you raise. Get the best! The Jamesway is the only coal brooder that has a special air purifier and also an air moistener and 3 point control—three exclusive Jamesway features you get in no other coal brooder.

BROODER NO. 652 \$22.50

Coal capacity about 45 pounds. 52 inch hover—the standard rating given by many manufacturers is 500 to 1,000 chicks. Jamesway prefers to say it will successfully brood 200 to 500 chicks in a good brooder house with 65 to 125 square feet of floor space. Weight 150 pounds.

BROODER NO. 660 \$23.50

Coal capacity about 45 pounds, 60 inch hover. Standard rating as given by many manufacturers is 1,000 to 1,500 chicks. Jamesway prefers to say that it will successfully brood 300 to 600 chicks in a brooder house with 125 to 400 square feet of floor space. Weight 155 pounds.

HASKELL IMPLEMENT AND SEED CO. LEWISTON MAINE

NEWTOWN Colony Brooder

Coal-burning, Self-regulating

The Newtown Coal-burning Colony Brooder needs no introduction to poultrymen. It was the first coal-burning, self-feeding, self-regulating Colony Brooder put upon the market—has been longer in use than another of its type—and is giving efficient service in every State of the Union and nine foreign countries. It represents the modern up-to-date brooder in the highest form of development. The Newtown way is the proven road to better profits.

These famous Newtown features insure: Superabundance of Heat. No crowding. Correct warmth for every chick. No chilling. No Overheating. Plenty of fresh air and exercise for all the Chicks.

No.	Canopy	Weight	Price
11	50 in. Dia.	195 lbs.....	\$32.50
12	56 in. Dia.	280 lbs.....	40.00

The Nos. 11 and 12 were designed especially for two-room colony houses, or large single room buildings.

The No. 11 for approximately 240 square feet and up to 500 chicks. The No. 12 for 400 square feet and up to 1000 chicks.

Putnam Brooder Heater

Build your own brooder with a Putnam Brooder Heater and a small shoe box. At no price, high or low, can a brooder be bought so economical of both fuel and labor, so simple and easy to operate, so perfectly ventilated, or one which will so surely raise healthy, vigorous birds. Suitable for 25 chicks. Price, \$4.75; postpaid, \$4.90

POULTRY SUPPLIES

JAMESWAY

New Oil Burning Brooder

Easy to run. Keep the fuel in the oil tank and that's about all there is to it, once the temperature regulator is set. No ashes to empty, grates to clog, or wicks to trim. Special clean out rod keeps burner free of carbon. No need of taking stove apart to clean burner. Gives better combustion, hotter flame and greater economy of fuel. Burner casting is large, easy to clean. Moisture pan below burner lessens fire hazards, moistens and vitalizes air. Large handy clean-out door in stove. Sensitive, double-action draft equalizer in flue side tracks down drafts, checks excessive up-drafts, keeps an even fire in the most blustery, changeable weather, 60 or 70 inch galvanized hover revolves around stove, large hinged door gives access to all parts of stove and floor under the hover. Double filter between eight gallon fuel tank and stove filters oil twice before it enters regulator valve. Stove burns good grade kerosene or 38-40 distillate. Weight of stove, hover, oil tank and support is 200 pounds crated.

Graylawn Louse-Chase

For lice on Poultry, Cattle, Horses, Mules, Goats and Swine.

5 oz., \$.40; postpaid, \$.50.
12 oz., .65; postpaid, .75.
22 oz., 1.00; postpaid, 1.12.

CONKEY'S POULTRY REMEDIES

Conkey's Head Lice Ointment.

Price: 1 oz., .10, postpaid, .15; 3 oz., .25; postpaid, .30.

Dr. Hess Instant Louse Killer

Kills lice on stock and poultry. Easily applied by putting in dust bath. Hens work it down into the feathers where the lice are. It kills lice on contact. It is also applied directly to the fowl if badly infested.

Kills lice and bugs on cucumber, squash and melon vines—slugs on rose bushes. It is non-poisonous, so may be used on edible plants with entire safety. Comes in handy sifting-top cans.

Prices: 1 lb. carton, .25; postpaid, .35; 2½ lb. carton, .50; postpaid, .60.

DR. HESS POULTRY PREPARATIONS

Dr. Hess Poultry Pan-A-Min

PAN-A-MIN has been known to poultry raisers for more than 30 years as Dr. Hess Poultry Pan-a-ce-a.

It is now a greatly improved product. More minerals have been added. It contains new medicinal ingredients, and other active ingredients in different proportions. The improved product has been given a new name. DR. HESS POULTRY PAN-A-MIN means Pan-a-ce-a plus.

PAN-A-MIN is of high value to moulting hens, in egg production, in reducing chick mortality, in bone and feather growth and in maintaining health.

Prices: 3 lb. Pkg. \$.50, postpaid, \$.63
7 lb. Pkg. 1.00, postpaid, 1.20
15 lb. Pkg. 2.00, postpaid, 2.30
25 lb. Pkg. 3.00, postpaid, 3.40
100 lb. Drum 10.00

For Worms in Poultry

Dr. Hess Poultry Ver-Mi-Trol

is a flock treatment. No individual handling of birds is necessary. It is simply given with the feed in two 10-day courses, three weeks apart, with DR. HESS POULTRY PAN-A-MIN fed regularly.

It is not drastic, does not throw hens or pullets off production and does not interfere with growth and development of young birds. It is palatable, all birds eat it readily.

Prices: 4 lb. Pkg. \$1.25, postpaid, \$1.40
10 lb. Pkg. 2.75, postpaid, 2.95

Dr. Hess Poultry Tablets (Formerly Roup Tablets)

While there is no absolute cure for roup, DR. HESS POULTRY TABLETS are of high value in treating locally the swellings incident to the disease.

The Tablets are used as a local anti-septic and to medicate the drinking water. Thus used, they aid in preventing spread of the disease. Once the Tablets are in solution, they remain so permanently.

Price: 100 Tablets, \$.50, postpaid, \$.57

Dr. Hess Chick Tablets

(Formerly White Diarrhea Tablets)

Most diarrhea conditions in chicks, often mistaken for Bacillary White Diarrhea, are the result of improper feeding or brooding, and can be corrected by DR. HESS CHICK TABLETS. These Tablets are a bowel astringent to be given in drinking water.

Once the Tablets are in solution they remain so indefinitely.

Price: 100 Tablets, \$.50, postpaid, \$.57

Standard Sanitary Churn and Mixer

What It Does. It will actually make two pounds of butter from one pound of fresh, sweet milk. The butter is delicious and sweet. Follow directions and you will get results.

(The proportion is one pound of butter to one pound or pint of milk.)

Other Uses. The Standard Sanitary Churn may also be used to make regular butter direct from cream; as a cream and egg beater; as a salad dressing or batter mixer; and as a butter renovator.

HORNE'S STRAINER CLAMP AND SEAMLESS MILK STRAINER

Horne's Screw Clamp Strainer

The screw clamp increases the diameter about three-quarters of an inch. The adjustment is made by drawing the edges together with the thumb screw.

Fig. A shows the filtering disc sealed outside the strainer outlet; every drop of milk must pass through the disc. Fig. B shows the perforated disc which removes pressure from the filtering material. The clamp shows the material held firmly in place.

Price 12A Horne Seamless Strainer, complete \$2.50; postpaid, \$2.75.

Combination 7"x7" Disc, cartons of 60, \$.75; postpaid, \$.85.

The "Facile, Jr.," Babcock Milk and Cream Tester - Cut Steel Gears

An exceedingly simple, light, compact and carefully designed apparatus, especially adapted to the use of the dairy, and also on account of its light weight, to the traveling dairy inspector.

Complete with full set of glass ware consisting of test bottles, pipette and acid measure; also test bottle brush and bottle of acid with full directions for use.

Prices: 2 Bottle Machine, \$11.75; 4 Bottle Machine, \$13.00.

The "Facile" Improved Iron Frame Hand Babcock Milk and Cream Tester

Handsome cast-iron case and cover, cut spur and worm gearing, malleable iron bottle carrier, seamless brass detachable swinging pockets for holding test bottles.

Enclosed gearing, bottles perfectly horizontal when rotating. Turns easily and runs smoothly and noiselessly at a very high speed.

"Boston" Aseptic Stricture Cutter

An Essential for Every Dairyman

The Boston is modeled on improved lines, and embodies the highest class of workmanship and utility, yet is so simple that professional assistance, while always desirable is not necessary.

Price, each, \$3.00;
postpaid, \$3.15

The Sensible Bottle Filler

This is a small tank, heavily tinned and holding about sixty quarts. It has two straight bore faucets in the bottom near the edge. They are inexpensive and very handy for the small milk dealers who do not feel like paying a large sum for one of the larger machines. Price, each \$8.00.

Toledo Milk Bottle Caps

Sani-Draw Cap

Standard Cap

Sure-Pull Cap

Toledo Standard Caps have been noted for their high quality, being made of the best grade of White Spruce Pulp Board obtainable.

Toledo Sure-Pull Caps. A cut-out slug in front of the tab following its shape provides an easy means of raising the tab from any angle.

Toledo Sani-Draw Caps for schools and restaurants where it is desired for sanitary reasons that the cap remain on the bottle when the tab is lifted to insert a straw through the opening for drinking purposes.

Write for samples and prices.

Champion Milk Cooler Aerator

A perfect Aerator, removing all flavors arising from excessive cabbage, turnip or silo rations.

It is equally well adapted to the use of any cooling medium, either running water, ice water, or, if a very low temperature is not required, ordinary well or spring water.

Is automatic, requiring

no attention while in operation.

LAWN SPRINKLERS

Hastings

A little beauty! Just what you've been looking for. Does anything and everything. Whirls a gentle rain-like shower to 30 or 40 feet away. Change it to a mist, a coarse spray, or a stream, by simple finger adjustment. Price, \$2.50; postpaid, \$2.65.

Dunk's Twin Tip

Meets requirements of the average home. Ideal for Larger Estates, Golf Courses, Rock Gardens. Area covered is controlled by Adjustable Twin-Tips. Will produce various streams from a small, gentle spray to a large shower like heavy rain.

Price, \$1.50; postpaid, \$1.60

WHIRLING SHOWERS

Brown's Whirling Shower is easily one of the best lawn sprinklers manufactured. Due to the variable nozzle, a variety of sprays are obtainable, from a fine mist to a drenching rain. The malleable iron base is practically unbreakable; the working parts are all of brass, providing against rust or corrosion. This Sprinkler is equipped with the new ball-bearing feature and will require very little attention.

Price, Whirling Showers, \$2.50; postpaid, \$2.65.

BRASS BARREL FAUCET

Ground Key. Lock Lever. $\frac{5}{8}$ in. oversize. $\frac{3}{4}$ in. thread.

Victor Game Traps

A reliable trap is as important to the trapper as a good gun is to the hunter. For the loss of one pelt often equals the cost of a whole season's traps.

In the minds of the trappers who have used various brands of traps, the Victor is conceded as holding first honors, for durability and general efficiency, all things being taken into consideration.

The MODERNE Range Oil Burner

**IT HEATS, BAKES, KEEPS YOUR
HOT WATER TANK HOT WITH
NO DIRT OR BOTHER**

The MODERNE way of cooking is the oil way. Today this industry is one of the busiest in the country, as housewives everywhere are acclaiming the ease, comfort and leisure time that oil burning makes possible.

The MODERNE burner is manufactured with the utmost care, along carefully developed scientific designs. It embodies many features, the worth of which can only be appreciated after years of trouble-free service.

The MODERNE Range Burner has many desirable features that make this burner the most outstanding on the market. The MODERNE is sold at a uniform price and not at so-called bargain sale prices.

We offer the finest material, the most perfect burner at the lowest figure commensurate with the best quality and performance.

Goodwin Grass Shears

Lawn trimming, once a dreaded chore, has been robbed of all its unpleasantness. For GOODWIN Grass Shears are so comfortable, so easy to operate that the job is over in a jiffy—and it leaves no fatigue.

The natural up-and-down movement of the GOODWIN eliminates wrist-tire and finger-ache; their advanced design keeps blades flat on the ground with handles up and out of the grass. A tension adjustment is provided to adapt them to all cutting requirement and prevent binding or spreading of the blades. Bright orange handles make them easy to find in the grass.

Shaped to get into out-of-the-way corners without discomfort or inconvenience, GOODWIN Grass Shears really do a better job of trimming your lawn.

No. 10 Goodwin Shears, Ball Bearing. Price, \$1.50; Postpaid, \$1.60.

No. 20 Goodwin Junior Shears. Price, \$1.00; Postpaid, \$1.10.

Price: 2 oz. can, .75; postpaid, .80

Martin's Paste Wax

Polishes quickly and easily—revives the original finish—provides actual protection for the surface on which it is used.

Because of the purity of the Wax Materials used in its manufacture, Martin's Paste Wax will cover more surface than other Waxes. This makes Martin's economical to use.

Martin's Paste Wax has none of the greasy, smeary, slippery characteristics so objectionable to housewives.

2½ oz. can, \$.30, postpaid, \$.35; ½ lb. can, \$.55, postpaid, \$.65; 25 lb. can, \$20.00.

Martin's Liquid Wax

Produces a rich, soft, velvety glow on furniture, floors and other surfaces to be waxed. Martin's has cleansing properties which remove dirt from the surface—the wax itself provides a non-dirt-collecting film over the surface. This polishes readily to a beautiful finish.

Handsome Maple, Birch, or Oak floors will be well protected with Martin's Liquid Wax.

For your fine furniture Martin's Liquid Wax will produce a finish to which dust and lint will not adhere and on which finger prints will not show.

Pint can, \$.90, postpaid, \$1.00; half pint can, \$.50, postpaid, \$.55.

**THE UNIVERSAL SUPER-
VACUUM ELECTRIC
CLEANER**

Different and Better

The Universal Model 425

A Low-Priced Very Efficient Cleaner

This cleaner's powerful far reaching suction is strong enough to clean all floor coverings thoroughly. It frees the rug from all surface litter, gritty dirt and embedded dust by the safest cleaning method known—a sweeping, rushing, current of cleansing air. Rugs last longer when they are cleaned by this harmless but efficient UNIVERSAL method.

Compactly designed with soft rubber casters, swiveled rear wheel and pistol grip handle, the UNIVERSAL is unusually easy to operate. It does not seal to the rug and runs lightly under furniture, backs, turns, and noses its way into difficult places at the slightest pressure of a guiding hand.

LAWN MOWERS

The
Superb

Superb is a strictly high-grade ball-bearing Lawn Mower. It is made of first-class material throughout and the workmanship and finish are unsurpassed. It has large driving wheels and fine cut gears, thus ensuring ease and quietness of running.

This Mower is furnished with patent double-edged bottom knife which is shaped like a piece of channel iron with two up-turned highly tempered edges.

The
Lakewood

This Mower we guarantee to be the best ball-bearing Lawn Mower, for the price, on the market. It has high wheels (9 inches), flat, steel sliding pawls in the ratchets, and large diameter revolving cutter (6 inches), furnished with four blades.

This Lawn Mower is equipped with our patent adjustable ball bearings, the adjustment of which is accomplished by means of a single screw.

No. 255

This is a good Mower at a medium price for all ordinary work. The drive wheels are eight inches in diameter. The revolving cutter is 5½ inches in diameter and has 4 crucible steel blades highly tempered and ground true their entire length. It is carried on our patented adjustable ball-bearings.

The
Nipper

This is a good Lawn Mower at a medium low price and gives the purchaser full value for his money. It has

brass bushings and the same ratchets and adjustments that are used on many of the high grade Mowers, and it is in every respect what is needed at the present time, viz., a Mower that will do good service and at a cost but little higher than the poor trash that is put out so freely.

Townsend's
Victory

We cannot offer a better Mower at any price. It has

ball-bearings of the very highest grade exact to ¼ of 1-1000 of an inch, which greatly reduces friction. Double Steel Ratchet, very swift and smooth in action, as well as exceedingly hard for durability. Triple Gear. Entirely enclosed, allowing no dirt or cut grass to find its way into the pinions or cogs.

Townsend's
Flyer

A splendid High-Grade Mower, at a little lower price than the "Victory." Ball-bearings entirely enclosed. Adjustments very simple. Knives very hard and of the best steel.

O-Cedar Polish

A Wonderful Varnish Food

For cleaning and polishing floors, furniture, automobiles, etc. O-Cedar is by far the most economical furniture polish, as it is used with water. Puts on a high, hard, lasting lustre, and does not leave a bluish cast and gummy surface. It contains no grease, mineral by-products or benzines.

Every ingredient of O-Cedar Polish is a pure vegetable substance. Positively will not ignite. It is easy to use. Very little rubbing is required.

O-Cedar Polish is well and favorably known and is widely advertised in connection with the O-Cedar Polish Mop.

Price: 4 oz. Bot.\$0.25 Price: 1 qt. Cans\$1.25

Notice—In ordering repairs always give name of machine and number of old part. When the number or letter cannot be found, it is always best to send, by parcel post or express prepaid, the old or broken part, thus avoiding mistakes or delays.

COLONIAL PAINT

Colonial House Paint

A coat of paint is less than 1-100 of an inch thick. When damp rainy weather is alternated with the baking rays of the sun, this film of paint must be mighty good to "Save the Surface it Covers."

Colonial Paint is made to resist the destructive action of the elements which causes the ordinary paint to soon perish.

WHY IS COLONIAL HOUSE PAINT BETTER? Purity

Unlike so-called "pure" paint, Colonial Paint is actually an absolutely pure paint because it contains only the highest grade of pure materials; Pure White Lead, Pure Oxide of Zinc, Pure Linseed Oil and the necessary color pigments and dryer.

The shades contain the necessary hardened tinting colors. The blind greens and some of the colors for trimming purposes are solid permanent pigments and therefore cannot be produced with either lead or zinc. Paint can be made of no better materials.

COLONIAL RAINPROOF FLOOR AND DECK ENAMEL

This is an enamel floor paint that flows on without showing a brush mark, leaving a mirror-like surface. One coat is sufficient on old work. Dries over night. Can be applied by anyone. Made for both exterior and interior use. Send for a color card of ten attractive shades.

COLONIAL RAINPROOF FLOOR AND DECK ENAMEL is the result of a scientific investigation as to the best materials and the proper manner of combining them in order to produce a desired result, viz.: An enamel that will dry quickly, firm, and successfully withstand to the greatest possible degree the hard usage to which floors and the like surfaces are necessarily subjected.

VEL-VE-TA

VEL-VE-TA Flat Oil Paint is an ideal finish for all walls. It dries with a velvet tone and soft, restful finish. Is washable and hence sanitary, and finger marks, dirt and blotches can be wiped off easily.

The twelve standard colors and White offer a wide assortment of popular wall colors. By an addition of white you can obtain lighter tints of any of the colors.

This paint may be used for all ceilings and walls, new or old woodwork, metal surfaces, concrete or cement, and all interior surfaces.

Bronzite

THE PERMANENT GREEN PAINT

Bronzite—"The permanent green paint"—insures the green color against fading on every job where it is used. Made in six beautiful shades and in all sizes.

No matter how good the rest of your home looks, if the green fades the whole job looks bad. Use Bronzite Green for perfect results.

Bronzite is ideal for all painting purposes where an intense green is desired. It is an exterior preservative paint of unusual excellence and is naturally of more than ordinary merit as an inside paint.

COLONIAL A NO. 1 VARNISHES

Colonial A No. 1 Varnishes are standard in quality, because they are made of the finest gums obtainable.

They are not affected by boiling hot water or ammonia.

Put up in all sizes and for all purposes.

LUS-TRO-LAC FOUR HOUR ENAMEL

Thousands of people have changed their furniture, autos, and boats from dull unattractive objects into shining examples of what just every day folks are able to make with a brush and a can of this wonderful Lustrolac Enamel—and it dries in four hours.

Dealers are turning their stocks on Lustrolac five to ten times a year because it is the best enamel you can possibly use on any surface either inside or outside.

Send for a free sample, enough to enamel the fenders of your car.

Lustrolac is also made in five shades of varnish stain suitable for floors and furniture—Light Oak, Dark Oak, Light Mahogany, Dark Mahogany, and Walnut.

Lustrolac Varnish Stain is made from the same varnish that makes Lustrolac Enamel so wonderful.

INTERESTING FACTS ABOUT LUSTROLAC ENAMEL

Several of the largest manufacturers of tubes used as containers for tooth paste, shaving soaps, etc., have adopted LUSTROLAC ENAMEL as their standard for enamel coating to be used on these tubes.

WHY?

Because it is the only enamel that retains its original luster and toughness when immersed for two days in a strong solution of soap and water.

LUSTROLAC is a SUPERIOR ENAMEL.

ADHESIUM

Adhesium is a wall paper size so sticky that lincrusta can be hung on any surface without fear of it coming off.

Adhesium will detect the hot spots, showing where to shellac to prevent free lime from burning through the wall paper.

Adhesium may be used as a primer on new wood, as a "between coater," thus saving stock and labor.

Adhesium is indispensable to the careful decorator.

Adhesium is cheaper than glue and 100 times more effective.

MARTIN VARNISH CO.

PIONEERS OF 100% PURE VARNISHES
MAKERS OF AMBER-LYTE QUICK DRYING FINISHES
BETTER THAN PAINT AND ENAMEL

In Colors—Tints—Whites and
Black

AMBER-LYTE QUICK DRYING FINISHES

Stay clean longer. Show no brush marks. Outwear old style coatings. Have greater resistance to moisture. Retain their original appearance better. Present a more favorable surface for recoating.

Martin's 100% Pure Floor Varnish is composed only of absolutely pure hard Fossil Gums, pure Vegetable Oils and pure Gum Spirits of Turpentine. Contains no adulterants or cheapeners of any sort, such as Rosin and Benzine, etc.

It produces a beautiful, clear, brilliant, lasting finish. Combines extreme durability—toughness—elasticity—and is water resisting. Remarkably easy working. Covers 750 square feet per gallon, one coat, with proper surface condition. Dries to walk on over night. Can be sanded in 24 hours, and rubbed and polished to a fine finish in three days.

Martin's 100% Pure Outside Spar Varnish

is especially prepared for finishing front doors, store fronts, window sills, porch railings, and other surfaces of wood, which are exposed to the most severe weather—possesses remarkable elasticity, contracting or expanding with cold or heat. Gives splendid results on all upper parts of water craft (see 4 Hour Spar Varnish, for use below the water line, and for other surfaces immersed in water).

Martin's 100% Pure Outside Spar Varnish is quite pale in color, and the tough finish it gives, protects and preserves the surfaces over which it is applied. Covers 750 square feet per gallon, one coat, with proper surface conditions. Allow 24 to 48 hours to dry between coats, depending on weather conditions. Allow an additional 24 hours before sanding.

Gals.	½ Gals.	¼ Gals.	⅛ Gals.	⅙ Gals.
\$5.00	\$2.70	\$1.45	\$.80	\$.50

THE HIGHEST QUALITY SPAR VARNISH

Martin's Amber-Lyte Penetrating Floor Finish

The feature of this remarkable combination of treated oils is the fact that it does not merely form a surface coating. It PENETRATES DEEP INTO THE PORES OF THE WOOD and hardens, binding the fibres of the wood together into a hard impenetrable surface, to which dirt and grease cannot adhere. It forms an ideal under-

coat for Martin's 100% Pure Floor Varnish.

Martin's Amber-Lyte is used alone as a practical finish for kitchens, schools, hospitals, churches and other institutions where there is excessive wear. It must be well brushed out, and applied in thin coats. Covers 1000 to 1200 square feet per gallon, one coat, with proper surface conditions. Dries hard over night and can be sanded in 24 hours.

Gals.	½ Gals.	¼ Gals.	⅛ Gals.	⅙ Gals.

ASBESTOLINE

PROTECTS AND PRESERVES ROOFS

The very best waterproof and weatherproof Asphalt of high elasticity thoroughly fabricated with ASBESTOS fibre constitute its ingredients and perfects a product that meets every climatic requirement or change—a substance that neither expanding heat or contracting cold affect.

The application of ASBESTOLINE requires no experienced help or any elaborate outlay for tools. A common floor hand brush is all that is needed and one coat of ASBESTOLINE will save that "worn-out, no-more-good roof," and keep it as tight as the proverbial drum for many years.

Aside from its long, life-giving properties, ASBESTOS being incorporated in ASBESTOLINE insures that ASBESTOLINE will not crack or peel, and it is impervious to acids, gases, or alkalies. Once it is set ASBESTOLINE is also fire resisting.

ASBESTOLINE on account of its heavy body seals up small holes, seams and cracks and creates an elastic roof without joints, seams or laps.

Use ASBESTOLINE for permanency on flat or sloping Roofs of Iron, Steel, Felt, Composition, or Gravel or on any surface requiring waterproofing or protection against the weather, acids, gases or alkalies.

We specially recommend ASBESTOLINE for waterproofing concrete and foundations and preserving of timber. The application is simple and the cost is very small. Every property owner, Industrial plant as well as the farmer, will save money by the various uses of ASBESTOLINE.

When you want Real Roof Protection at LOW cost—
USE ASBESTOLINE

"Dandy-Lion" Weed Killer

Dandelion, Pigweed, Burdocks and other common weeds quickly and easily destroyed without cutting or digging, by use of the new "Dandy-Lion" Weed Exterminator. Cutting or pulling off the tops only retards the growth, the weeds soon re-appear, more vigorous than before. One operation with the "Dandy-Lion" kills root and all.

How It Works

All working parts are made easily accessible. The base with all working parts is quickly unscrewed and opened up for cleaning or adjustment. The plunger is pushed down into the crown of the weed and the hole is enlarged by moving the handle with a circular motion. Then by pressing down the handle, the valve opens, the desired amount of weed killing solution is deposited in the centre of the root to be killed and the work is done. Price, \$1.00.

A "Good Roof" means a "Trouble-free" Roof

Here's a roofing you can put on a building—and then forget.

Rotproof and rustproof—Everlastic Mineral-Surfaced Roofing doesn't call on you for care or maintenance,—no painting, no staining, no upkeep of any kind.

And it's fire-safe. If sparks or embers light on your roof, they sizzle out harmlessly. Moreover, Everlastic Mineral-Surfaced Roofing adds good looks to a building. It presents a surface of fadeless mineral in attractive colors—soft Red, moss Green, or shadowy Blue-Black.)

Note this special feature of real

value—the 2 inch "selvage." This furnishes an accurate guide in laying. It's a simple matter to distribute the cement evenly on this selvage—no cement streaks smearing up the roofing. Moreover, laps stay tight.

In brief, no better value on the market than this fine, time-proved roll roofing.

Smooth-Surfaced Roofings: Where this type of roofing is desired we recommend the Barrett Everlasting Brand, a roofing of heavy felt base thoroughly saturated with bitumen, that will give long years of satisfactory service.

A Barrett shingle roof makes any house easier to sell. Color in a roof also helps the sale value. Everlastic

Multi-Shingles, colorful and sturdy, are frequently used for re-roofing over old wooden shingles.

Not Just a Roof - A Lasting Protection

Any roofing will protect your house—for a while. But you want lasting protection. Protection against leaks—against heat in summer and cold in winter—against fire.

All this is assured in Barrett Everlastic Shingles. And in addition you get color—beautiful reds, greens, shadowy blue-blacks as well as variegated tones.

While Barrett has many styles of shingles, none is more popular than the sturdy Everlastic Multi (4-in-1) self-spacing strip shingle. It's now made in

36 in. width instead of 32 in., a real improvement. It takes 10% fewer strips per hundred square feet. There is a corresponding reduction in laying costs and the larger shingles look very handsome on the roof.

You can make no more satisfactory selection than to choose Everlastic Multi-Shingles. Sizes: 10 in. x 36 in. and 12½ in. x 36 in. and both attractively priced.

We will gladly send you an interesting roofing booklet.

STRAIGHT-AWAY GARAGE DOOR HANGER

A Practical Outfit

"Straight-Away" is easily and quickly installed. It is made to fit standard doors. In the carton all parts and screws are separately packed and marked where they are to go. No possibility of making a mistake. You, yourself, can install it in an incredibly short time.

Its straight track does away with extra labor and extra cost where a supporting arm is required. And it permits of saving of space, because the doors are **Folding-Sliding**. The **Offset Swivel**—an exclusive Porter feature—insures a perfect fit of doors against jamb and weather-strip. No possible chance for a "Straight-Away" outfit to sag, spring or bind. Slotted holes in the hanger plate make it easily and quickly adjustable to unevenness in floor, etc.

What the Set Includes

The "Straight-Away" Garage Door set contains

every thing necessary for you to immediately install it. Note that no brace timbers are required, as the track is straight throughout its length.

The set is designed primarily for standard doors, 2 ft. 8 in. x 8 ft., these filling the regular width opening of eight feet.

Price, complete with all fittings as illustrated above, including 8 feet double V track.....**\$7.50**

HAY CARRIER OUTFITS

SPECIAL NOTICE: When requesting quotations do not fail to give exact length of barn, whether ridge or full rafter, and distance between rafters. Also state whether you expect to hoist from end or center of barn.

Estimates for Hay Carrier Outfits

Estimate of material required for a Steel Track Outfit for different barns:

For a 40-foot barn, One Carrier, 36 ft. Track, 12 Hanger Hooks, 12 Rafter Brackets, 1 Harpoon, or Grapple Fork, 3 Pulleys, 3 Floor Hooks, 140 ft. 3/4-inch Manila Rope, 55 feet 3/8-inch Check Rope, 1 Rope Hitch.

For a 50-foot barn, One Carrier, 48 ft. Track, 20 Hanger Hooks, 20 Rafter Brackets, 1 Harpoon, or Grapple Fork, 3 Pulleys, 3 Floor Hooks, 160 ft. 3/4-in. Manila Rope, 60 ft. 3/8-in. Check Rope, 1 Rope Hitch.

For a 60-foot barn, One Carrier, 54 ft. Track, 20 Hanger Hooks, 20 Rafter Brackets, 1 Harpoon, or Grapple Fork, 3 Pulleys, 3 Floor Hooks, 185 ft. 3/4-in. Manila Rope, 65 ft. 3/8-in. Check Rope, 1 Rope Hitch.

Above estimates of Rope are for an End Hoist. In hoisting from center of barn, less Rope will be necessary.

Myers Self-Oiling Bulldozer Power Pump

The Power End consists of a one-piece casting which forms the base of the pump and oil reservoir and encloses all working parts, protecting them from dirt or injury, and securing safety of operation. From the oil reservoir in the base, oil is carried by the main gear to the highest parts of the pump and by a system of channels distributed to all moving parts and returned again to the reservoir. This system of flood lubrication contributes quiet operation and long life, with a minimum of attention.

Garden Cultivators and Seeders

Seeder and Single or Double
Wheel Cultivator

No. 201

The No. 201 Machine is a combination outfit which may be used as a hill or drill seeder, double or single wheel cultivator, plow or hoe, as conditions require. It has all the equipment to serve the gardener from the initial seeding, until final cultivation. It is readily converted from one use to another; the change from seeder to cultivator being accomplished by removing two red-headed bolts. One standard frame is used throughout.

As a seeder, this machine opens the furrow, drops the seed, closes the furrow, packs the earth, and marks the next row—all in one operation. The seed regulator is made entirely of brass, with openings die cut to insure absolute uniformity. This gives perfect control of the seed flow and insures a uniform drop. Sows all seeds from beans down to the finest garden variety, in continuous drills, or hills, 4, 6, 8, 10, 12 or 24 inches apart. Adjustments in furrow-opening shoe and furrow coverer permit planting at any depth up to 2 inches.

No. 201. Weight 60 lbs. Price\$16.25

No. 205

The man who must do a great deal of seeding and do it repeatedly, requires a machine which is always set up and ready for use. He does not favor a combination machine such as our No. 201 described above.

To meet this demand we offer our No. 205 Hill and Drill Seeder. It will sow any kind of seed from beans down to the very finest of garden seed, either in drills, or in hills spaced from 4 to 24 inches apart. The brass seed regulator is absolutely accurate and control of the seed flow is 100% perfect.

No. 205. Hill and Drill Seeder only. Weight, 50 lbs.
Price\$13.75

Double Wheel Cultivator

The No. 212 Cultivator may be used as a double wheel hoe, plow, or cultivator astride the row during early cultivation, and as a single wheel cultivator between the rows later. The angle steel arch is high enough to permit straddling until the plants are well grown.

Tool equipment is made of high grade steel, with surfaces polished and lacquered so as to scour in any soil. Cutting edges are sharpened to reduce friction. Moldboards are curved to turn the earth cleanly. All shanks are malleable and unbreakable. Teeth are designed to thoroughly stir up the soil and give the plant roots plenty of air. Wheels are 16 inches high, with 1¼ inch tire. Handles are seasoned hardwood, with the easy plow-handle grip, and adjustable to height. Reinforced with steel cross brace which will not break or pull out. Standard steel frame and arch are used, so that seeder parts may be added if desired, making the complete No. 201 outfit.

No. 212. Weight 35 lbs. Price\$9.50

Garden Plow

The high wheel garden plow is a universal favorite with the truck farmer or gardener where the work is sufficient to justify separate machines for seeding and cultivating.

A 24 inch high wheel is used which makes traction very easy. Handles are of the right length and adjustable to height for the comfort of the operator. Frame work is of steel, giving great strength and rigidity without excessive weight. The Plow, double pointed shovel and sweep, are made of regular plow steel and are polished and lacquered. The cultivating attachment is made from malleable iron and is equipped with 5 removable steel teeth.

Standard Package—One in bundle, K. D.; weight about 22 lbs.

No. 320. Garden Plow. Price\$3.25

All Prices Subject to Change Without Notice

HASKELL IMPLEMENT AND SEED CO. LEWISTON MAINE

Most Popular Seeder Made

The MIDGET SEEDER will pay for itself in a short time, because it saves by sowing accurately. Sowing by hand wastes seed.

It is very easy to operate and drills almost any kind of garden seed from the smallest up to and including peas and beans.

The index is in plain view and easily adjusted. The shoe is adjustable for any depth desired, and the coverer swings free.

The Midget opens the furrow, sows the seed and covers up, all in one operation.

It is sold with handle complete, or may be easily attached to almost any wheel cultivator. Hopper holds one pint. Weight 6 pounds.

No. 1 H with handle, Price \$4.00

Quick-Adjustable Cultivator

The TRUE TEMPER GENEVA, No. G2, is recognized everywhere as the only real quick-adjustable cultivator on the market.

It has a New Mulcher-Pulverizer, Weeding Hoe, a Plow and five Cultivator Teeth, all permanently attached to a revolving steel plate.

Any of these tools may be securely locked into working position by a few turns of the hand Wheel—a time and labor saver.

Machine has steel forged tools, well selected oak handles, with comfortable handle grips. It has 14-inch steel wheel and is finished in colors, then varnished. Weight 20 pounds.

No. G2, Price \$5.75

Champion No. 50F

steel wheels have steel bushed hubs, the handles are adjustable not only for the height of the operator but also for the set of the working tools.

The Moldboard Plow with Landside is properly designed and oil tempered, and will hill, plow or furrow.

The Reversible Sweep with four Cultivating Teeth and the Reversible Calf and Bull Tongue work perfectly and handle without difficulty, and are so carefully made that the machine runs easily and in perfect balance.

50F. Weight 20 lbs. Price \$3.25

Champion No. 50F has the popular braced steel Hook Frame and Oak plow-grip handles. It is handy and efficient, an extreme value among cultivators and cannot be matched at the price. The

Iron Age

No. 19-C

No. 19-C Iron Age Wheel Cultivator and Plow is a low-priced tool and will always be a convenience to have for many kinds of work.

It does the necessary plowing in many soils, opens furrows for seed or fertilizer and covers on the return trip. Shipping weight, 22 lbs. Price \$4.25

Steel Land Roller

Drums No. 12 gauge steel. Angle steel frame. 1 5/8 in. steel axle. Double seat spring. Hard wood, oil soaked bearing.

No. 106 1/2. 8 ft., 3 section, 24 in.

American Beauty Dust Sprayer

A one man sprayer. Easily and comfortably carried on the back. Easily operated by a convenient hand lever. Constructed of light-weight, rust-proof galvanized steel. Weighs only 18 pounds. Improved construction of working parts prevents clogging or waste. Powerful bellows drives dust in an unbroken, swirling cloud which covers foliage and allows no pest to escape.

American Beauty, Price \$18.00

A Complete Line of Good Farm Implements

There is a John Deere implement for practically every farming operation. Each carries the John Deere trade-mark, the best-known badge of quality in the implement world.

John Deere-Syracuse—1441 Series

When you have plowing to do in hard, stubborn soil, you will appreciate the work of a John Deere-Syracuse No. 1441 series,

walking plow. This series have steel wearing parts except the share, which is chilled.

No. 1442S cuts 5 to 7 in. deep and 10 to 13 in. wide. Weight, 150 lbs.

No. 1441S cuts 5 to 8 in. deep and 12 to 15 in. wide. Weight, 152 lbs.

For gritty or gravelly soils. Sloping landside prevents furrow wall from breaking or caving in. Moldboard has sufficient curve to pulverize in stubble land. Also works equally well in loam and turns sod perfectly. Rib in landside holds plow to its work. Steel beams—guaranteed not to bend or break. Shares and landsides chilled extra deep by special Syracuse process. Full horn share—a new cutting edge on the shin is obtained with each new share. Cuts 3 to 5 in. deep, 6 to 8 in. wide. One horse size. Weight 82 lbs.

Syracuse No. 1466 Chilled Plow

Syracuse No. 31 Plow

The moldboard of hardened soft-center steel of this plow is so formed that a furrow may be turned smoothly up or down on sloping land. This makes it an especially good plow for rolling land. Extra high, steel landside with a cast shoe. Handles adjustable. Cuts furrows 5 to 8 inches deep, 12 to 15 inches wide. Weight 113 lbs.

Syracuse No. 32 Plow

Cuts furrow 5 to 7½ inches deep, 10 to 13 inches wide Weight 110 lbs.

Syracuse Diamond Swivel Plow

This type of Side Hill Plow has always been very popular in New England, being light, but still having great strength and good turning qualities. Easy shifting clevis and also automatic shifting Coulters except on small size. Furnished in three sizes: Diamond A2, Medium, 2 Horse, Weight 130 lbs. Diamond B2, Light, 2 Horse, Weight 126 lbs. Diamond C2, Light, 1 Horse, Weight 85 lbs.

John Deere-Syracuse No. 1 Contractors' Plow

Excellent for general grading purposes. Hard iron wearing parts. Extra heavy beam, share and strip. Steel wheel frame. Loop handle wear irons. Wood or steel handles. Steel share can be furnished on repair orders. Will turn a furrow 5 to 9 inches deep, 12 to 15 inches wide. Cast moldboard and share. Two to four horses.

Syracuse No. 98 Contractors' Plow

Especially adapted for tearing up cobblestones or macadam pavement. Strongly built throughout. Adjustable and double reversible crucible steel point. Adjustable shoe. Loop handle wear irons. Four to six horses.

Syracuse No. 99 Contractors' Plow

For severe grading purposes in shale or hardpan. Slight turning capacity. Steel truss beam. Steel moldboard and landside. Separate shin piece. Heavy overlaid wrought steel share. Adjustable shoe. Loop handle wear iron. Four to eight horses.

Heavy overlaid wrought steel share. Adjustable shoe. Loop handle wear iron. Four to eight horses.

Taylor Subsoil Plow

A valuable plow in sections subject to drouth or where subsoil does not permit water, air and roots to penetrate readily. Cuts a gash in bottom of furrow, permitting water to move downward and spread out.

Subsoil Plow

John Deere—Syracuse Shovel Plow Wood Beam

Blades and wings made of steel. Wings adjustable to throw more or less dirt. Especially adapted for hilling potatoes and other light work. No. 26 Wood beam with gauge wheel. Weight, 45 lbs.

HASKELL IMPLEMENT AND SEED CO. LEWISTON MAINE

John Deere No. 4 Tractor Plow

Greater strength, more clearance in this new two-bottom tractor plow. Every vital part is built extra strong. Power lift. Cushion spring release hitch protects both plow and tractor.

No. 40C Tractor Plow

The lighter-draft two bottom tractor plow with the great draft - reducing combination of self-adjusting hitch and rolling landside. The hitch is always automatically right at all depths; the bottoms always run true and level, and all of the weight is wheel-carried; therefore, the "40" pulls exceptionally light. Special steel makes this light-weight plow a giant in strength. Beams guaranteed not to bend or break. Simple, positive power lift.

John Deere Tractor Plow No. 41

This plow is built especially for Fordson owners who require a single-furrow plow.

It is widely used in plowing extremely heavy soil; in plowing unusually hard ground, or in plowing unusually deep.

In such conditions, having the right hitch at all times is especially important.

The hitch of the No. 41 adjusts itself. This is a time-saving, work-improving, draft-reducing feature which every user of the No. 41 appreciates. Every plow for the Fordson needs it; only the John Deere plows for the Fordson have it.

Every time you adjust the plow for depth with the handy depth lever, the hitch adjusts itself up or down to the correct line of draft.

Thus, the hitch being always correct, the bottom always runs true and level. There is no "nosing in" or hopping out. At all depths, without any attention to the hitch adjustment by the operator, the bottom pulls light and does good work.

John Deere—Syracuse Two Way Sulky Plow ..With the Steel Frame and Auto Foot Frame Shift..

The John Deere—Syracuse No. 4 Sulky Plow represents the highest type of material and workmanship that it is possible to procure. The entire frame and beams are constructed entirely of high carbon steel, hence are very strong and durable.

The Auto Foot Frame Shift makes it possible to regulate the width of furrows with perfect accuracy when plowing around curves, in irregular fields, and on side-hills. By its use the team is relieved of all side strain.

Sizes	Cuts
1342S-1442S	3 to 8 in. deep
Medium Size	12 to 16 in. wide
1341S-1441S	4 to 9 in. deep
Large Size	14 to 18 in. wide

Fitted with either Jointers, Hanging Cutters or Fin Cutters. Two or Three-Horse Eveners.

Brillion Soil Pulverizer and Packer

This implement crushes, pulverizes and packs the soil so that moisture is conserved, germination hastened — soil-blowing and washing are prevented and weeds killed. Strong steel frame; V-shaped or tooth wheel sections; self-aligning roller bearings. Steel axles. Various styles and sizes for either horses or tractor.

The Ireland Geared Hoist

A powerful machine that saves time and labor in storing hay and in other hoisting. Used in connection with harpoon fork or sling. Attach it to your own engine. Safe and easy to operate. Instant control.

Type C—Single Drum With Brake

Type C has level automatic brake rim on drum, which automatically engages with adjustable brake locks, thus holding load at any desired point, without attention. Brake may be rendered inoperative so drum may turn freely.

John Deere Model "B" Disc Harrow

The Flexible, Third-Lever Harrow

Each gang of the Model "B" can be given the proper angle to pulverize under difficult conditions, and can be given light pressure, by means of lever controlling powerful pressure spring and pivoted yoke, to go over ridges without burying harrow at its center; or heavy pressure to penetrate and pulverize in dead furrows and other depressions—no ground is skipped. Strong, all-steel frame; double-bar, riveted gang frames; oscillating scrapers and unusually convenient grease cups.

Rear gang and hitch can be furnished to convert this harrow into a double action, horse- or tractor-drawn harrow.

John Deere Model "L" Tractor Disc Harrow

With Yielding Lock Coupling

Exclusive yielding lock coupling, special aligning device and pivoted yoke with spring-pressure feature insure a better job of disking entire width of harrow under all field conditions with this harrow.

Yielding lock coupling locks on the straight-away, compelling rear gangs always to cut down ridges left by front discs; yields in turning—no trailing of discs—not skidding around corners.

A flexible harrow. Gangs follow the uneven surface of the ground because they work independently of each other. Either section can be angled from the tractor by means of convenient crank, without stopping or backing. Front gangs can be given light or heavy pressure, by means of a crank and powerful pressure spring.

John Deere Pony Tractor Disc Harrow

For use with any standard tractor. Front section, out-throw; rear section, in-throw—making seed bed level and thoroughly pulverized. Double-bar gang frames, unusually strong. Equipped with John Deere yielding lock coupling—rear gangs trail in proper manner—less strain on harrow—easier pull for tractor around corners. Oscillating scrapers.

Gravely Garden Cultivator

Another outfit for heavier cultivating. Notice how the steels are in front, right where you can watch them.

With Five 2¼ in. Cultivating Steels. Gravely Garden Tractor is adapted to large or small crops. Can go anywhere a man can walk. Very easy to handle and leaves the ground in good condition.

Folder and prices on request.

Champion Root Cutter

Will cut all kinds of roots either fine for sheep or much coarser for cattle.

Randolph Tractor Saw Rig

Made of selected air-dried hardwood, thoroughly braced, making a strong rig equal to the heavy duty when sawing heavy cord wood with a tractor. 1½ in. arbor, 6x6½ in. pulley. Will take circular saw up to 32 in. in diameter.

Deere Combination Tongue Truck

For Steel Stub Disc Harrow

The new Deere Combination Truck and Fore Carriage illustrated here-with will fully meet the requirements of all disc harrow users. It is simple, strong and compact in construction. The wheels are solid steel with wide oval tires and with closed bearing boxes.

Can also furnish Tongue Truck to fit any make of Disc Harrow having a wood stub pole.

Improved Stone Boat Front

This device enables the farmer to make a stone boat in one hour's time with ordinary straight plank that he may have on the farm. All tools necessary are saw and bit.

JOHN DEERE WIDE-TREAD GENERAL PURPOSE TRACTOR

Showing Flywheel Side of John Deere Wide-Tread General Purpose Tractor

This is the New John Deere General Purpose Wide-Tread Tractor built especially for potato and corn growers. No other general purpose tractor has ever been designed that fits in so perfectly with conditions in this territory.

The Work It Will Do—The John Deere General Purpose Wide-Tread Tractor is ideally fitted for all farm jobs within its power, including efficient, big-capacity operation in planting, cultivating, and digging potatoes. Cultivates two rows at a time at the rate of 20 to 30 acres a day. Will pull two-bottom plow (moldboard or disk), two-row planter with fertilizer attachment, two-row tractor drive digger, and six-row tractor power sprayer.

Power Lift—Fourth Power Outlet—This tractor supplies power at the drawbar and at the belt, it has a power take-off; but more than this, it has a power lift which starts operating by a touch of the foot, to lift or lower the special cultivating or hilling equipment. The power lift makes the John Deere a complete self-contained, mechanically-operated and controlled outfit.

Simple, Understandable, Practical — There is nothing complicated or hard to understand about this tractor and its equipment; no expert operator is required. With this power equipment on your farm, help will no longer be a problem, and in addition to this you can get your ground prepared and crop planted, cultivated, and harvested under favorable weather conditions for bigger yields.

SPECIFICATIONS

HORSE POWER. Suitable for 2-14" plows, 22" thresher.
SPEEDS. Low, 2- $\frac{1}{4}$; intermediate, 3; high, 4- $\frac{1}{2}$, reverse, 1- $\frac{3}{4}$ MPH.
MOTOR. 950 R. P. M., 2-cylinder "L" head type horizontal.
CRANKSHAFT. 3" diameter drop-forged, long bearings.
CONNECTING ROD. Drop-forged, two-bolt type.
LUBRICATION. Force-feed, geared pump.
CARBURETOR. Double-nozzle type with air choker.
AIR CLEANER. Oil-filter type with vertical air stack.
IGNITION. High-tension magneto, with enclosed impulse starter.
COOLING. Tubular radiator, thermosyphon.
AIR FAN. Gear-driven, no belts.
GOVERNOR. Enclosed, fly-ball type.
CLUTCH. 10" dry disks, locking in and out.
BELT PULLEY. 13" diameter x 6- $\frac{1}{2}$ " face, 950-R.P.M.
BELT SPEED. 3200 feet per minute.
TRANSMISSION. Spur gear, selective type, 3 speeds forward, speed reverse.
GEARS. Forged steel cut teeth and heat-treated.
FINAL DRIVE. Enclosed roller chains.
DRIVE AXLE. 2- $\frac{1}{2}$ " diameter, high-carbon steel.
DRIVE WHEELS. 44" diameter x 8" face.
FRONT WHEELS. 24" diameter x 4" face.

JOHN DEERE GENERAL PURPOSE FARM TRACTOR

**Greater
Earning
Power
on the
Farm**

**The Tractor
That Develops
More Power
With Less
Weight**

John Deere General Purpose Farm Tractor

In no other farm tractor built can you find the combination of advantages found in the John Deere.

It contains the very improvements and refinements in tractor construction you have been looking for. It develops greater power with much less weight. The working parts are all enclosed and operate in an oil-tight, dust-proof case. All working parts are bathed in oil automatically. It is simple, compact, low to the ground. Easy to understand, operate and adjust.

A Light-Weight Tractor

The John Deere, developing 10 H. P. on the drawbar and 20 H. P. at the belt, weighs only 3,600 pounds. It will not pack the soil or mire down. This is an important point with every tractor user. The correct distribution of weight provides ample traction to handle loads up to its capacity. The center of gravity being low, gives the John Deere a decided advantage over the ordinary tractor.

Simple Adjustments Easily Made

The clutch brakes, drive chains, taper roller bearings on rear axle and front wheels and the carburetor, all can be adjusted quickly and accurately from the outside of tractor.

The John Deere GP-443 Two-Row Cultivator

is equipped with lever spring-teeth on the front rigs. Hillers, mounted on a specially-designed frame, are used at the rear. This outfit is designed for use in rows spaced 34 or 36 inches apart.

The power lift raises and lowers the working equipment—there are no levers to operate. This John Deere feature saves a great amount of hard work and speeds

up the cultivating job because it is not necessary to stop the outfit at the ends of the rows.

The rigs can be raised high off the ground by the power lift and the outfit can be backed up. The differential brakes on the rear tractor wheels make short turning easy.

John Deere-Syracuse GP-5 Two-Row Potato Hoe

The John Deere-Syracuse GP-5 Two-Row Tractor Potato Hoe is a practical innovation in power farming equipment.

By its use in connection with the John Deere General Purpose Wide-Tread Tractor and GP-443 Two-Row Cultivator, a complete cultivating and hilling operation can be accomplished with speed and efficiency in a single trip through every two rows.

GP-443 Two-Row Cultivator—Spring Tooth, with No.
GP-5 Two-Row Potato Hoe

Row spacing 34 in. and 36 in., adjustable on front pipe. Spring tooth rigs in front, eleven teeth. Rigs are equipped with compression springs to insure penetration and control depth.

NEW JOHN DEERE

The Low-Down Spreader with the Beater on the Axle and the Box-Roll Turn, Narrow Type—Tight Bottom

The easy-loading feature on the New John Deere Spreader is one of its important advantages. The low box does

away with high pitching, the hard part of loading; it saves work.

The beater on the axle, which permits lowering the rear end of the box, because the axle is not underneath it. In accomplishing this desired result, it has not been necessary to reduce the height of the drive wheels, neither is it necessary to throw the manure over the drive wheels in loading.

The Box-Roll Turn, which permits short turning without cutting the front wheels under the box, gives you a box that is exceptionally low and easy to fill.

Don't forget, the New John Deere Spreader is the only spreader built that has the beater on the axle and the box-roll turn. Both are exclusive features which are of real value to you.

Roller-bearing equipment at both ends of all three beaters reduces draft and wear at these important points.

A tapered box—wider at the rear—does away with friction between manure and box sides as the load moves toward the beaters.

John Deere Manure and Straw Spreader

The Spreader with the Beater on the Axle

The Low-Down Spreader with the High Drive Wheels

Easier on the Man. Only 36 inches to the top of box—6 to 10 inches lower than other spreaders—a big time- and labor-saving feature.

Easier on the Horses. The high wheels on this spreader from 4 to 8 inches higher than used on other spreaders, give it a light-draft advantage.

The load of manure, which in itself weighs a ton on the average, is moved back to the beater on an apron which runs on many rollers—the load is not dragged.

The location of the beater in relation to the apron is such that the teeth engage the manure as it is fed to them in practically a horizontal position—they do not work against the load as it moves backward.

Does a Better Job of Spreading. You can load the John Deere just right for the most effective spreading—flat on top and from the front to the rear.

John Deere K H Riding Cultivator

177—8 Shovel Spring Tooth

When you are in the field with the John Deere K H Cultivator, you are equipped for clean cultivation in rows of any width from 30 to 48 inches.

Balances Perfectly

With the master lever, you raise or lower both rigs. When the rigs are raised for turning, the cultivator is perfectly balanced. The pole does not fly up. When you lower the rigs by releasing the master lever, all shovels enter the ground level.

Full Width Cut, Always

The rigs shift parallel. That means that the sweeps or shovels on both rigs always point straight ahead in the direction in which the cultivator is travelling and cut out full width of the rigs.

Shovels Penetrate Hard Soil

The hitch of the K H is of the drop, or pendant, style; pull of the team is directly on the rigs, thus bringing the draft in the proper place for penetration.

176—8 Shovel Spring Trip

John Deere K L Riding Cultivator

With the K L you can do the same good job of cultivating in rows varying from 30 to 48 inches wide. The wide adjustment is made by shifting the wheels and the frame in and out—a simple, easy job. Descriptive folder will give full details.

KL177—8 Shovel Spring Tooth

All Prices Subject to Change Without Notice

John Deere Steel Walking Cultivators

Deere Steel 14 Tooth Cultivator

5 Tooth Steel Cultivator

Because of the steel and malleable construction these Cultivators are very durable and free from breakage. Furnished with Horse Hoes or Long Hillers.

Especially adapted for use in corn and small plants. Stirs the dirt thoroughly but does not throw dirt on plant. Fitted with steel reversible teeth.

No. 320. 14 Tooth lever and gauge wheel. Price, \$8.00

Deere Handy Farm Mixer

It will mix Concrete, Fertilizer, Stock and Chicken Feed. It will wash Potatoes, Beets and other root crops. Every farm owner has ideas of improving his farm, increasing its value not only by increased fertility of the soil, but also by the addition of permanent farm structures. Concrete forms the cheapest and best foundation for all improvements.

All Metal Construction

Steel and iron are the materials that make the Handy Mixer. Simple Gear Drive. Sturdy, powerful gear-drive construction. Drum 22 in. diameter, 21 in. deep, 17 in. opening. Capacity, wheelbarrow load. Weight, 180 lbs.

Same high-grade construction as the 5 tooth and having two more teeth.

7 Tooth Steel Cultivator

No. 314. 7 tooth with lever and gauge wheel. Price, \$9.25

Horse Hoe Attachment, for 5 or 7 tooth..... 1.75
Long Hiller Attachment, for 5 or 7 tooth..... 3.75

Deere Universal Spike Tooth Harrow

Made of steel throughout which gives strength without useless weight. The lever allows the teeth to be angled in any desired position and is also provided with a spring trip, allowing the teeth to give in stony or rooty ground.
One Section, 30 Teeth, One Horse\$10.50
Two Sections, 60 Teeth, Two Horse 21.50

John Deere Type E Gasoline Engine

The Enclosed Engine that Oils Itself

The John Deere Type E puts the farm engine now on the same high plane in design and construction with other modern power machinery.

The complete enclosure of its operating parts and its automatic oiling system, while outstanding features, are but two of the many improvements that make it a profitable investment for every farmer.

Type E engines are built in three sizes. 1½ H. P. furnished with Magneto or Battery Equipment. 3 H. P. and 6 H. P. with Magneto only.

Spring Tooth Harrows

This harrow's sharp-pointed penetrating teeth work the seed bed from the bottom to the top. They tear out underground roots, stems and weeds, bringing them to the surface, mix and fine the seed bed. Non-clogging. Any number of sections can be combined. Reversible levers for use at front of harrow and tractor hitch for easy operation with tractor.

15 Tooth, two horse\$22.00
17 Tooth, two horse 23.00
10 Tooth, one horse, top handles 19.50
10 Tooth, one horse, less handles 16.00

HASKELL IMPLEMENT AND SEED CO. LEWISTON MAINE

John Deere No. 999 Corn Planter

No. 999 with Fertilizer

Equipped with John Deere Natural Cell-Fill, edge-delivery seed plates—a dropping device just as accurate as the human hand.

Variable-Drop Device—a great feature—enables you instantly to change the drop to meet varying conditions of soil in the same field. By merely shifting a foot lever, without leaving the seat or even stopping the team, you can change the drop to two, three or four kernels per hill—always the exact number desired.

999 Fertilizer Attachment

Fertilizer attachment handles any standard fertilizer, any quantity up to 700 pounds per acre.

Fertilizer can be checked with each hill of corn or drilled along the row while corn is being checked.

Hoover Visible Potato Planter with Fertilizer Attachment

The Hoover is noted for its accuracy in dropping potatoes. Agitator in hopper prevents potatoes from bridging. Hopper holds 2½ bushels. Positive feed wheel elevates potatoes to the picking chamber. Speed of this wheel is easily controlled to keep the right amount of seed in the picking chamber; picking chamber concaves hold seed properly for the pickers. Adjusting springs give the right pressure on the seed to get best results.

VAN BRUNT FERTILIZER DISC DRILL

Light Weight Light Draft Force Feed
Spring Pressure Large Capacity

Even Seeding in Furrows of Uniform Depth. No Ground or Seed Wasted.

The drill that puts any seed, from alfalfa to bearded oats, at the bottom of furrows of even depth, without choking up and failing to sow part of the field or planting too much in other parts. All grain is ready for harvest at one time. Any standard fertilizer is handled by the Van Brunt just as accurately as seed. **Send for Booklet.**

Rawlings Pulverizer

Comes in two sizes.

6 foot

8½ foot

Hallock Type Weeder

7½ foot

Van Brunt Lime and Fertilizer Sower with Oscillating Agitator

The Van Brunt Lime and Fertilizer Sower is built in the standard size to cover eight feet of ground, with a carrying capacity of ten bushels. For strength, durability and simplicity it is unexcelled.

This sower has 36-inch steel wheels with staggered spokes, heavy wide rims, removable dust-proof boxings, and compression grease cups with chilled wheel bearings.

The hopper is exceptionally strong, of selected well-seasoned matched lumber; steel ends with angle steel corners, thoroughly braced; close-fitting covers and removable screens. **Send for Booklet.**

John Deere Farm Trucks

In price, strength, draft and finish, John Deere farm trucks give exceptional satisfaction. They stand hard usage year after year because they are built right and in a factory that has an established reputation for making only the best wagons and trucks. The same careful workmanship and the same well-seasoned, selected oak and hickory are used in their construction as are used in the famous John Deere Farm Wagons. We can furnish trucks with either wood or steel wheels, in various styles.

John Deere High-Lift Mower

No. 2 Mower, 5, 6 and 7 ft. cut

will appreciate the quickness and ease with which every field condition can be quickly met.

Its durable and simple construction; the ease with which adjustments can be made to keep it in good running order; the ease with which repairs can be made—these qualities too, built into this light-draft, high-lift mower, will prove your good judgment in your selection.

No. 2 Mower with Tongue Truck

Extra high lift with foot and hand lever combined. Flexible cutter car. Easy to keep in perfect cutting order.

John Deere Self-Dump Sulky Rake

A rake you can keep in good running order for years. Important working parts interchangeable, reversible or adjustable, giving extra wear with no repair expense. Arched steel axles give wheels proper pitch and gather at all times. Foot trip secures instant dumping.

Made in 8-, 9-, 10- and 12-Foot Widths.

New York Champion Wood Rake

to our customers who do not desire a steel rake.

When you get on the seat of the John Deere Mower the first outstanding feature you will notice is its high, easy lift with either foot or hand lever. You

Powerful cutting mower—compensating drive gears—set offsets thrust of other set—eliminates side wear and insures maximum power. High lift with foot lever and ex-

tra high lift with foot and hand lever combined. Flexible cutter car. Easy to keep in perfect cutting order.

For years the New York Rake has been the best known and most successful wood rake in this locality. We would certainly recommend the above

to our customers who do not desire a steel rake.

New Deere Hay Loader

The loader with the flexible floated gathering cylinder. Successfully handles anything from the lightest swath to heaviest windrow. Does not dig into

the ground surface, but rakes the ground clean and gathers no trash. A steady stream hay is put onto the wagon without damaging the hay. The

New Deere automatically adjusts itself to any amount of hay. Wheelbarrow mount prevents sagging and spreading. Automatic hitch and your ability to unhitch from top of load are additional advantages.

John Deere-Dain System Windrow Hay Loader

Especially adapted to handling hay air-cured in the windrow. Good capacity and good work. Handles alfalfa, clover, beans and similar tender hay without loss of leaves. Only one cylinder—lighter than a double-cylinder loader. Drum is mounted on the axle. Especially adapted to hilly countries because of very light draft. Pivoted front truck makes handling easy—a boy can do it. Large expansible throat openings and slow speed of raking teeth prevent beating and threshing hay. Rakes only clean hay, because it has flexible teeth, and the hay is placed in the center of the wagon.

John Deere-Dain System Rake

Cure hay nature's way with the John Deere-Dain System Rake. Preserve its natural color and richness of foliage. You can follow the mower closely with this rake. The steady motion of the curved teeth

throws the hay into loose, fluffy windrows, through which the air readily passes. It does the work without damaging the hay. The inclined frame gives increased capacity at point where volume of hay handled is greatest. All adjustments can be made from the seat with the rake in motion.

When you buy **NIAGARA DUST** and **DUSTERS** you buy Protection

Niagara Blower
Dust Gun—Simple—Easily
Operated—Most Effective.

The ideal dusting machine
for small acreages, estates
and greenhouses.

Niagara Blower Dust Gun Single Row Attachment
Niagara Blower Dust Gun with Two Row "Y"
Attachment

Niagara "Kolo" Dusting Materials—The new exclusive Niagara Dusts that "Stick through wind and rain"—have toxic properties unapproached by any other sulphur dusts.

Niagara Model F Fruit Duster complete with 5 H. P. New Way Engine and Special Orchard Truck.

Fruit Duster

Niagara Kolodust—the new exclusive Niagara Fungicide used to control diseases of tree and bush fruits.

Niagara Model F Orchard Duster mounted on a special cross reach orchard truck, powered by a 5 H. P. New Way Engine is the best insurance a fruit grower can have that he will get in and over his orchard on time to control insects and diseases.

DUSTING POTATOES AND TRUCK CROPS

Niagara Copper Lime Dusts are the standard of perfection—"mechanically correct—scientifically accurate."

Niagara Kolotex—The new exclusive Niagara fungicide and insecticide dust used to control both diseases and externally chewing insects on tree and bush fruits.

Crop Duster

The new Niagara Dri-Fog Crop Duster will dust 3 to 3½ acres of potatoes or other row crops per hour, covering completely the upper and under surfaces of the plants, delivering dust at the rate of 5 to 100 pounds per acre.

POMO-GREEN WITH NICOTINE

Complete protection against Black Spot—Mildew—Leaf Eating Insects—Aphis.
Pomo-Green is not for Roses alone, but for the entire garden.

1 lb. can\$.75
5 lb. can 3.00

Niagara D-25 Dust—fungicide only, used to control blight of potatoes and some other diseases of truck crops. Packed in metal air tight containers.

Niagara Calcium Arsenate—The cheapest and most effective poison that can be purchased in the trade today. Find out all about this poison before you buy. Price on demand.

Niagara D-18 Dust—Fungicide and insecticide, used to control blight of potatoes, etc., also containing poison to kill potato bugs and other externally chewing insects.

Niagara A-1 Nicotine Dust will control aphis, leaf-hopper and other sucking insects of ground crops and fruit crops.

Niagara P. A. Nicotine Dust. Used in place of A1 where a stronger nicotine content is desired. Recommended especially for peas.

Niagara Arsenate of Lead is still the standard for comparison.

These two poisons are the standards by which other poisons are judged. They may be used in combination with Lime-Sulphur, Bordeaux Mixture and oil sprays like Emulso. We are not offering you a price because the price on these commodities fluctuates from day to day. When you are ready to buy, we shall be pleased to give you quotations.

Stevens Fertilizer Sower

This sower combines strength, simplicity and durability. Will sow all kinds of fertilizers either broadcast or in rows. Equipped with long gauge, giving approximate amount sowed per acre.

Size, 8 ft.; capacity, 9 bu.; weight, 540 lbs.

John Deere Grain Binder

Lasts longer, costs less to operate and does better work. Extra strong, rigid platform. Widely overlapped main frame, hot-riveted together equipped with

self-aligning bearings. Knotter has case-hardened wearing parts. Outer reel support. An easily operated and adjusted bundle carrier. Equipped with all-steel, quick-turn tongue truck that takes neck weight and side draft from horses. A light-draft, easily-operated binder.

John Deere Corn Binder

The binder with quick-turn tongue truck. Quick-turn tongue truck takes off neck weight and permits quick and easy turning at ends. All important parts are equipped with

roller bearings. A light-draft and long-lived machine.

The New "Bufco" Forge with 18 in.-22 in. Hearth

The advantages of the hand-crank blower over the old lever and wheel types are well known. Until the perfection of the "Bufco" blower, however, the cost of the crank type has often been prohibitive.

The new "Bufco" has smoothed out the difficulties. It is a small blower of new design with a gear ratio of 36 to 1, steel spur gears throughout, a one-piece gear case, which is oil and dust tight, and

a 5½ inch straight blade fan in a 7½ inch fan case. The fan is made of sheet steel, and is powerful enough to furnish a strong blast with little effort.

The old agricultural type forge will soon be obsolete, now that the "Bufco" can be had in the following:

"Bufco" 061, 18 in. diameter of Hearth, Shield type of hood, 85 lbs. shipping weight. Price, \$12.50

Silver's "Ohio" Light Draft Silo Fillers with Suction Blower

Direct Drive. Drive pulley, cutting cylinder and fan wheel all on main shaft utilizes every ounce of power.

Patented Friction Reverse. By the use of a single lever all moving parts except knife cylinder, can be instantly stopped, started or reversed without the slightest strain. Not a gear tooth changes mesh in reversing.

Accessibility. Knives and cutter bar can be readily removed for sharpening or replacement without disturbing other parts.

Special Features of No. 40, No. 60 and No. 90

- No. 40**—Ohio Blower with traveling feed table; with 9-inch throat, two knives and curved elbow for top of pipe, not mounted. Weight, 790 lbs.
- No. 60**—Ohio Blower with traveling feed table; with 11-inch throat, two knives and curved elbow for top of pipe, not mounted. Weight, 835 lbs.
- No. 90**—Ohio Blower with traveling feed table; with 13-inch throat, two knives and curved elbow for top of pipe, not mounted. Weight, 900 lbs.

"Buffalo" No. 611 Ball Bearing Drill

The frame of this drill is strongly ribbed and will withstand extremely rough handling.

Shaft and spindle of steel, extra heavy and carefully finished.

Bearings are bored and reamed in the solid metal of the frame. This insures smooth, easy running.

Gears are carefully made and fitted. Has hand and automatic feeds.

A round, slotted table is provided, which can be adjusted to any position—up, down or sideways.

SPECIFICATIONS

Drills to center of 11 inch circle; drills holes up to $\frac{3}{4}$ inch; spindle diameter $\frac{7}{8}$ inch; run of feed 3 inch; run of table 9 inch; length over all 33 inches; shipping weight 63 lbs.

Spindle drilled for $\frac{1}{2}$ -inch straight shank bit. On special order, furnished also for $\frac{5}{8}$ or $\frac{1}{2}$ -inch.

Price, \$12.00

Ohio Lever Cutter

No. 778

The "Ohio" Lever Cutter will cut hay, straw, corn stalks and every kind of feed. It is equipped with one 11-in. oil-tempered knife; also provided with a guard plate, adjustable to vary the lengths of cut.

No. 778 "Ohio" Lever Cutter, weight 55 lbs.

\$6.00

Pony Hand Feed Cutter

The Pony Cutter, as illustrated below, is strictly a hand machine.

A bushel of hay can be cut in thirty-five seconds. Cuts all kinds of feed. Only high-grade material is used, and makes it a strong and efficient cutter.

No. 783. One 11 $\frac{1}{4}$ in. knife cut $\frac{1}{2}$ to 2 in. Weight 165 lbs.

\$23.00

No. 783

Steel Road Scrapers

They are shaped cold from a single piece of steel lapped and riveted at the corners. They are uniform in thickness throughout except at the corners, where they are of double thickness.

No. 0. Capacity 9 cubic feet, weight 150 lbs.

No. 1. Capacity 7 cubic feet of earth, weight 98 lbs.

No. 2. Capacity 5 cubic feet of earth, weight 90 lbs.

King of the Corn Field Planter

This Corn Planter has been for years one of the leading machines for planting corn, beans, peas, beets and other seeds used throughout this territory. It is equipped with ferti-

lizer distributor, and is perfectly adapted to all requirements of this section. It can be arranged to drop any desired quantity of seed or fertilizer; can also be used for planting corn and beans at the same time, dropping each kind of seed in rotation.

PAPEC FARM MACHINERY

PAPEC ENSILAGE CUTTER

A new Papec Cutter will put more even-cut ensilage into your silo at a lower cost per ton than any other machine. That's why there are more Papecs in use than any other make. Whether your power is a three horse gas engine or a 15-30 tractor, you will find a Papec size and model that meets your exact requirements. The new Papec catalog gives figures on silo filling costs and tells how they can be reduced. Call for your copy next time you are in town—or write for it today.

HAY CHOPPER-SILO FILLER

Here is a machine that is unsurpassed as a silo filler, yet has an even more important use. With it you can put chopped hay into the mow easier, cheaper, and quicker than you can put up whole hay with a fork or slings. No more work in the hot, dusty mow. The hay is blown wherever you want it. It takes half the usual space, keeps perfectly, is easier to get out of the mow, is cleaned up by all classes of stock without waste of coarse parts. Send for our booklet, "A Better Way to Put Up Hay".

FEED AND ROUGHAGE GRINDERS

You know from experience that grinding increases the value of small grains around 25%. Grinding roughages will pay even better dividends. Papec Hammer Type Grinders handle bulky crops as well as grain because they have governor-controlled, self-feed rolls. With a Papec you can make rations right on your farm that will reduce and perhaps eliminate your commercial feed bill. Your feed is ground exactly the way you want it, when you want it and at a real saving in the cost of hauling your grain to mill. Come in and investigate this grinder for yourself or drop us a line for complete literature.

PAPEC ½-TON FEED MIXER

If you have been mixing your feeds by hand here is good news for you. The new Papec half ton batch mixer will prepare your rations a whole lot easier and cheaper than you can do the job in any other way. Delivered to you completely assembled ready to go to work. Operates with small gas engine or electric motor. Thoroughly tested and recommended by practical farmers and experiment stations. After you have used a Papec Mixer for a month you will wonder how you ever got along without it. Send for Feed Mixer Folder and price today.

John Deere-Hoover Potato Digger

The name of Hoover on potato machinery has been a symbol of quality for many years. Linked with the name John Deere, the combination is one that carries even greater prestige. The Hoover line of potato machinery now has behind it the strength of the John Deere organization, makers of quality farm implements for nearly a century.

John Deere-Hoover Potato Diggers have exclusive features which enable them to deliver the crop in better condition, run lighter, last longer and operate more efficiently under all conditions.

Do Not Damage Potatoes

The rod type of elevator made of manganese steel elevates the potatoes without rolling and bruising them. The elevator is of original Hoover design with the links alternately raised and lowered. This tends to lighten the draft, prolongs the life of the digger, removes the dirt to best advantage, and leaves the potatoes in better condition.

Improved Wood and Pole Saw Frames

Yukon Feed Cooker and Water Heater

The boiler of our Yukon Feed Cooker is made from heavy 16-gauge blue annealed steel. All joints and seams securely welded and tested. The boiler is furnished with four heavy handles on sides. This is a very desirable feature as the feed can be carried to the stock. The boiler sets down one inch on the inside of the furnace which makes it impossible to get out of position.

The body forming the fire box of the cooker is also made of 16-gauge blue annealed steel. The grate is furnished so that either wood or coal can be used.

The fire door is large enough to admit chunks 10 in. square. Furnace sits on legs like a stove, making it perfectly safe to use in a building; burns cobs, wood or coal.

No.	Capacity Gallons	Width Inches	Length Inches	Depth Inches	Weight Comp.	Price With Grate

Farmers' Favorite Cooker

DESCRIPTION

The top section or boiler, is made of heavy galvanized steel that will not rust, and is also provided with four heavy tinned malleable iron drop handles.

This sets down inside the lower section one inch, thus making it impossible for the boiler to slip to one side and tip over, as when on top of furnace.

The lower section of furnace is made with cast iron ends, and the center, or body, of heavy steel plate.

With this construction the entire surface of the boiler is exposed to the heat, thus making it a very quick heater.

No. 2. 30 Gallon.

Price, \$20.00

Richland Tires Fill Every Need for Pneumatic Equipment-

BALANCE Perfect balance—accounts mainly for the superb performance of Richland Double Duties on today's new cars—Every ounce of tire weight is exactly countered; every unit of the tread is equally offset—Thus the tires roll smoothly, pick up speed quickly, are instantly responsive to the driver's need—Richland Double Duty Balloons are made from the best materials the market offers—They have the extra margin of strength to meet emergencies—They possess endurance, stamina, dependability—Fine tires in every sense of the word, they perform brilliantly, serve long and faithfully—Their graceful line and balanced design add beauty to the most distinguished cars.

RICHLAND is one manufacturer that does not sell its product on the basis of a single feature of construction. It is the Richland belief that the car owner looks beyond special features to mileage—the real index of tire value. A tire is no better than its weakest part. Richland tires are built with parts of balanced strength, so the finished product faithfully serves the car owner, delivering generous mileage beyond normal expectation.

Richland Double Duty—Extra Heavy Tubes

Richland Heavy Duty Trucks

Richland Heavy Duty Cords are prime favorites with truck owners who watch tire cost-per-mile. The economical performance of these casings on commercial vehicles goes back directly to the Richland policy of having the pick of quality materials fashioned into the finished tire by expert workmen, according to advanced engineering principles. The carcasses of Richland Heavy Duty Cords are thus strong to stand the thrust of heavy weights, supple to protect the vehicle and the load. Truck owners who are compelled to avoid costly tie-ups of men and vehicles, stick close to these big, tough Richland Heavy Duty Cords.

Richland Extra Heavy Tubes

Richland tubes are tire shape tubes, built by a special process so the tube wall is everywhere of equal thickness. The life of the tube is thus prolonged. Driving is made safer and freer from trouble. Richland tubes are silver gray—with steam vulcanized splices, double reinforced valve bases. Balloon sizes are made in Extra Heavy and Standard weights.

Richland Heavy Car Type Cords

Richland Heavy Car Type Cords are prime favorites with experienced tire buyers. They are extra size. Their tough treads last long and wear evenly. Dealers who have handled this line for years will tell you that for mileage, for appearance, for value, this high pressure tire is without equal.
